## **Efficient Algorithms For Mpeg Video Compression:**

Efficient Algorithms for MPEG Video Compression Dzung Tien Hoang, Jeffrey Scott Vitter, 2002-02-21 Video compression is the enabling technology behind many cutting edge business and Internet applications including video conferencing video on demand and digital cable TV Coauthored by internationally recognized authorities on the subject this book takes a close look at the essential tools of video compression exploring some of the most promising algorithms for converting raw data to a compressed form

**Efficient Algorithms for Mpeg Video Compression** Hoang, 2003-05-01 *Handbook of Video Databases* Borko Furht, Oge Marques, 2003-09-30 Technology has spurred the growth of huge image and video libraries many growing into the hundreds of terabytes As a result there is a great demand among organizations for the design of databases that can effectively support the storage search retrieval and transmission of video data Engineers and researchers in the field demand a comprehensive reference that will help them design and implement the most complex video database projects *Handbook of Video Databases Design and Applications* presents a thorough overview in 45 chapters from more than 100 renowned experts in the field This book provides the tools to help overcome the problems of storage cataloging and retrieval by exploring content standardization and other content classification and analysis methods The challenge of these complex problems make this book a must have for video database practitioners in the fields of image and video processing computer vision multimedia systems data mining and many other diverse disciplines

*Broadband Last Mile* Nikil Jayant, 2018-10-03 *Broadband Last Mile Access Technologies for Multimedia Communications* provides in depth treatments of access technologies and the applications that rely upon them or support them It examines innovations and enhancements along multiple dimensions in access with the overarching goal of ensuring that the last mile is not the weak link in the broadband chain Written by experts from the academic and commercial segments of the field the book's self contained sections address topics related to the disciplines of communications networking computing and signal processing The core of this treatment contains contemporary reviews of broadband pipes in the classes of copper cable fiber wireless and satellite It emphasizes the coexistence of these classes within a network the importance of optical communications for unprecedented bandwidth and the flexibility and mobility provided by wireless The book also includes perspective on the increasingly important topic of network management providing insights that are true regardless of the nature of the pipe The text concludes with a discussion of newly emerging applications and broadband services This book offers an all in one treatment of the physical pipes and network architectures that make rich and increasingly personalized applications possible It serves as a valuable resource for researchers and practitioners working in the increasingly pervasive field of broadband

**Information Security** Masahiro Mambo, Yuliang Zheng, 2003-07-31 This book constitutes the refereed proceedings of the Second International Information Security Workshop ISW 99 held in Kuala Lumpur Malaysia in November 1999 The 23 revised full papers presented were carefully reviewed and selected from 38 submissions The book is divided in topical sections on

electronic money electronic payment and unlinkability secure software components mobile agents and authentication network security digital watermarking protection of software and data key recovery and electronic voting and digital signatures

**Real-Time Video Compression** Raymond Westwater, Borko Furht, 2007-08-28 Real Time Video Compression Techniques and Algorithms introduces the XYZ video compression technique which operates in three dimensions eliminating the overhead of motion estimation First video compression standards MPEG and H 261 H 263 are described They both use asymmetric compression algorithms based on motion estimation Their encoders are much more complex than decoders The XYZ technique uses a symmetric algorithm based on the Three Dimensional Discrete Cosine Transform 3D DCT 3D DCT was originally suggested for compression about twenty years ago however at that time the computational complexity of the algorithm was too high it required large buffer memory and was not as effective as motion estimation We have resurrected the 3D DCT based video compression algorithm by developing several enhancements to the original algorithm These enhancements make the algorithm feasible for real time video compression in applications such as video on demand interactive multimedia and videoconferencing The demonstrated results presented in this book suggest that the XYZ video compression technique is not only a fast algorithm but also

provides superior compression ratios and high quality of the video compared to existing standard techniques such as MPEG and H 261 H 263 The elegance of the XYZ technique is in its simplicity which leads to inexpensive VLSI implementation of any XYZ codec Real Time Video Compression Techniques and Algorithms can be used as a text for graduate students and researchers working in the area of real time video compression In addition the book serves as an essential reference for professionals in the field *Multimedia Image and Video Processing* Ling Guan,Sun-Yuan Kung,Jan Larsen,2000-08-23 Multimedia stands as one of the most challenging and exciting aspects of the information era Although there are books available that deal with various facets of multimedia the field has urgently needed a comprehensive look at recent developments in the systems processing and applications of image and video data in a multimedia environment
