Familiar Realities:

Disobliging Reality Frank Juszczyk,2016-01-11 When Frank Juszczyk's wife died he grappled with big questions How could his reality persist without her being a part of it And what was it about reality that interrupted their time together He told himself that he'd discover the operative dynamic that split them apart and where she'd gone In this exploration of quantum physics he seeks to answer questions such as Why does there have to be a here and a not here Is reality taught to us or does it simply exist If we were to reduce or eliminate the persistence of reality what would that be like Are there possible parallel universes that have the same degree of reality as ours and if so what does that say about how our reality is determined in the first place Albert Einstein said that reality is merely an illusion and while the concepts in this book are complicated you don't have to be a physicist to learn how his statement is true or how to deal with it on a personal level Overcome consensus thinking minimize the persistence of an illusory reality and discover freedom of choice with the powerful revelations in *Disobliging Reality*

Cognitive Feelings Jérôme Dokic,2025-11-18 This book proposes a comprehensive theory of cognitive feelings also referred to as noetic epistemic or metacognitive feelings There are pivotal moments in our mental lives when even

before we have explicitly thought or reflected on the matter we become aware of our own epistemic relationship with the world and the extent to which we can exert control over it The book analyses these moments and the subjective experiences involved which can be fleeting or more lasting These experiences are cognitive feelings such as feelings of familiarity knowing confidence rightness understanding certainty presence and reality and on the negative side feelings of unfamiliarity or strangeness not knowing wrongness perplexity doubt uncertainty absence and unreality Some cognitive feelings have evocative names such as the tip of the tongue experience the aha moment or the eureka effect The set of cognitive feelings has fuzzy boundaries and shares similarities with other experiences such as surprise curiosity and interest but also with intuitions hunches or presentiments The book puts forward a unified account of cognitive feelings as genuine affective experiences that play a constitutive role in the geography and economy of the mind at the interfaces between perception memory imagination belief and action Like ordinary emotions cognitive feelings have both an evaluative and a motivational dimension Specifically they are based on monitoring features of our epistemic situation and generate action tendencies aimed at improving it The book also presents detailed applications of this account to two main types of cognitive feelings namely feelings of reality and familiarity It examines the role of these feelings in various domains such as virtual reality aesthetic experiences and self transcendent experiences i e experiences in which the apparent boundaries between the self and the external world are altered The methodology is philosophical analysis informed by empirical studies in cognitive science

Aleksis Kivi and/as World Literature Douglas Robinson,2017-03-06 Aleksis Kivi 1834 1872 is Finland s greatest writer His great 1870 novel The Brothers Seven has been translated 59 times into 34 languages Is he world literature or not In Aleksis Kivi and as World Literature Douglas Robinson uses this question as a wedge for exploring the nature and nurture of world literature and the contributions made by translators to it Drawing on Deleuze and Guattari s notion of major and minor literature Robinson argues that translators have mainly majoritized Kivi translated him respectfully and so created images of literary tourism that ill suit recognition as world literature Far better he insists is the impulse to minoritize to find and celebrate the minor writer in Kivi who sends the major language racing

Climate Change Epistemologies in Southern Africa Jörn Ahrens,Ernst Halbmayer,2023-05-26 This book investigates the social and cultural dimensions of climate change in Southern Africa focusing on how knowledge about climate change is conceived and conveyed Despite contributing very little to the global production of emissions the African continent looks set to be the hardest hit by climate change Adopting a decolonial perspective this book argues that knowledge and discourse about climate change has largely disregarded African epistemologies leading to inequalities in knowledge systems Only by considering regionally specific forms of conceptualizing perceiving and responding to climate change can these global problems be tackled First exploring African epistemologies of climate change the book then goes on to the social impacts of climate change matters of climate justice and finally institutional change and adaptation Providing important insights into the social and cultural perception

and communication of climate change in Africa this book will be of interest to researchers from across the fields of African studies sociology anthropology philosophy political science climate change and geography *Roumanian Folk Tales Retold from the Original* Petre Ispirescu, Jacob Bernard Segall, 1925 The Personal Edition of George Eliot's Works George Eliot, 1901 *School Science and Mathematics* School Science and Mathematics, 1917 **Charles Dickens' Works: Great expectations.
