Scientific Inquiry Cycle: Review

Science helps communities solve problems by applying knowledge and creating things that "solve" with a local issue such as water quality or waste management using science to make or improve solutions can have a positive impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions begins by considering various constraints, such as budget, time, and safety concerns. Community members have a part of a solution might be a challenge, however, as it is important to weigh these trade-offs carefully. For example, creating materials for a water filter may affect its cost and ease of use, which influenced the effectiveness of the solution.

After identifying a solution, documenting how it works, what constraints affected it, and any compromises that have already been and should involve on the way. Communication, using digital media, and reflecting on the results of the solution are important steps. This process can help identify future needs, locally encourage responsible decision-making, and build community trust.

01. Mark the best answer for each question.

1. What is the first important step when working on how to solve a local problem?
 - a. Designing a solution
 - b. Finding the most expensive materials
 - c. Spreading safety concerns
 - d. Understanding the problem fully
2. What does documenting constraints in a solution help with?
 - a. Finding the constraints of the solution
 - b. Evaluating the solution's cost and safety
 - c. Showing how to avoid constraints
 - d. Determining what the solution has no costs
3. Which is an example of a trade-off?
 - a. Finding a solution with no costs
 - b. Finding a solution with no safety
 - c. Finding a solution with no time
 - d. Using unsafe materials
4. Why is communication important?
 - a. To attract new team members
 - b. To make ideas shared
 - c. To finish the problem as quickly
 - d. To avoid discussing the work

02. Mark if the statement is True (T) or False (F).

1. A solution made after one failed attempt is always better than the first one.
