Sec't. 2. The House of Representatives shall be composed of members chosen every second Year by the People of the several States, and the Electors in each State shall have the Qualifications requisite for Electors of the most numerous branch of the State Legislature.

Europes First Constitution

Charles Alan Fyffe

Europe's First Constitution:

The Foundations of Europe Thomas Hörber, 2007-12-18 Thomas Hörber analyses the building process of European integration. He shows the parliamentary discourses of France, Germany, and Britain to be representative of the national position of these states towards the developing concept of Europe. He covers all key events and developments of the time which had an impact on the European integration process and provides an explanation for the convergence of national discourses towards a common Europe. This development was by no means a given and the analysis of parliamentary debates shows for the first time how vigorous the debates were on European integration in the 1950s and how, despite setbacks, notably the failure of the European Defence Community, the discussion went in favour of integration. The European Central Bank in the European Constitutional Order René Smits, 2003-12 The author provides a thought-provoking account of the role of the European Central Bank (ECB) in the European constitutional order. He briefly outlines the history of the debate on the future of European governance and examines the current constitutional position of the ECB. He then sets out what the application is of general Community law to the ECB and the current proposals for constitutional change both in the application of the Treaty of Nice and in the context of the current constitutional European Convention. He concludes by offering an inspiring contribution to the wider constitutional debate. The text of this book provided the basis for a lecture given by the author on accepting the Jean Monnet Chair of the Law of the Economic and Monetary Union at the Faculty of Law of the University of Amsterdam on 4 June 2003. *The Constitutional Theory of the Federation and the European Union* Signe Reihling Larsen, 2021-02-04 From the start of the European integration process, one question has puzzled scholars: what type of political association is the European Union? In the absence of an agreed-upon response, most scholars have suggested that the European Union is sui generis. This book challenges the sui generis thesis by demonstrating that the EU is not a unique form of association but rather a federal union of states or what this book calls a federation. This is a discrete form of political association on par with, though differentiated from, political modernity's two other main forms: namely, the state and the empire. The federation cannot be understood on the basis of the general theory of the state or its concept of sovereignty. The statist imaginary still dominates both the debates on federalism and the EU, meaning that all federal policies are either seen as confederal associations of sovereign states or sovereign federal states. This book challenges this binary by demonstrating that the federation is not a super-state but a discrete political form with its own constitutional theory. It is characterized by a double political existence: a lack of internal hierarchy and the internal absence of contestation or repression of sovereignty. This book details the key aspects of federal constitutional theory and how this theory accounts for the EU's constitutional form, as well as the crises it has faced in recent years. This book is broken into five chapters that cover the introduction to federalism, origins of the EU, state transformation and teleology, unity in diversity, and emergency rule without a sovereign. This book draws on a variety of literatures and historical material to help the reader develop a critical understanding of constitutional

myths and the theory of federalism **European Constitutional Imaginaries** Jan Komárek,2023 What does it mean to say that the European Union has a constitution theoretically but more importantly practically What sort of possibilities such assertion opens for various actors politicians legal professionals or the general public And what is the role of constitutional thinkers in establishing constitutional discourse as the dominant way in which European law is or was conceived after 1989 This volume seeks to answer such questions with a special emphasis on the last one European Constitutional Imaginaries are the central focus of the book These are sets of ideas and beliefs that help to motivate and at the same time justify the practice of government and collective self rule established by the constitution written or unwritten Such imaginaries are as important as institutions and office holders They provide political action with an overarching sense and purpose recognized by those governed as legitimate The book brings together reflections by lawyers philosophers sociologists or political economists who shed light on various constitutional imaginaries of Europe They provide critical intellectual histories of particular legal approaches to European integration and look behind the language of law to reach deeper insights into the contested history and political economy of Europe They ask us to think about European law differently **The Origins of Energy and Environmental Policy in Europe** Thomas Hoerber,2012-12-12 This book examines the development of a European environmental conscience through successive steps of European integration in energy policy In the 1960s 70s the world was slowly beginning to realise that environment degradation was not sustainable With phenomena such as acid rain it became clear that pollution did not stop at national boundaries and the European environmental conscience developed in parallel to such growing environmental concerns The oil crisis in 1973 was a turning point in the integration process for both energy policy and environment policy and while further integration towards the European energy policy failed the environmental policies took shape in measures such as energy saving The Commission incorporated both energy and environmental policies into the EU policy canon and built an institutional framework responding to the insufficiency of national policy answers and the developing environmental conscience of the European people This book will be of interest to students and scholars of European Integration European Union politics and history and environmental politics and policy **Europe's First Constitution** Richard T.
