Evaluating College Writing Programs:

Evaluating College Writing Programs Stephen Paul Witte, Lester Faigley, 1983 Noting that present evaluation systems are so limited that they are neither reliable nor valid this monograph critically reviews studies designed to evaluate composition programs at four major universities The book offers theoretical and practical guidance through discussion of generalities from the four studies and pertinent questions and guidance to evaluators of composition programs The first chapter looks at the state of the art of evaluating writing programs discussing the need for such evaluation and at two dominant approaches to writing program evaluation The second chapter discusses a quantitative model of writing program evaluation in terms of four university studies giving an overview of the dominant quantitative approach Chapter 3 discusses a framework for evaluating college writing programs including five components of writing program evaluation and the final chapter discusses accommodating context and change in writing program evaluation HTH **Very Like a Whale** Edward M. White, Norbert Elliot, Irvin Peckham, 2015-03-04 Written for those who design redesign and assess writing programs Very Like a Whale is an intensive discussion of writing program assessment issues Taking its title from Hamlet the book explores the multifaceted forces that shape writing programs and the central role these programs can and should play in defining college education Given the new era of assessment in higher education writing programs must provide valid evidence that they are serving students instructors administrators alumni accreditors and policymakers This book introduces new conceptualizations associated with assessment making them clear and available to those in the profession of rhetoric and composition writing studies It also offers strategies that aid in gathering information about the relative success of a writing program in achieving its identified goals Philosophically and historically aligned with quantitative approaches White Elliot and Peckham use case study and best practice scholarship to demonstrate the applicability of their innovative approach termed Design for Assessment DFA Well grounded in assessment theory Very Like a Whale will be of practical use to new and seasoned writing program administrators alike as well as to any educator involved with the accreditation process

Guide to College Writing Assessment Peggy O'Neill, Cindy Moore, Brian Huot, 2009-04-15 While most English professionals feel comfortable with language and literacy theories assessment theories seem more alien English professionals often don't have a clear understanding of the key concepts in educational measurement such as validity and reliability nor do they understand the statistical formulas associated with psychometrics But understanding assessment theory and applying it by those who are not psychometricians is critical in developing useful ethical assessments in college writing programs and in interpreting and using assessment results A Guide to College Writing Assessment is designed as an introduction and source book for WPAs department chairs teachers and administrators Always cognizant of the critical components of particular teaching contexts O'Neill Moore and Huot have written sophisticated but accessible chapters on the history theory application and background of writing assessment and they offer a dozen appendices of practical samples and models for a

range of common assessment needs Because there are numerous resources available to assist faculty in assessing the writing of individual students in particular classrooms A Guide to College Writing Assessment focuses on approaches to the kinds of assessment that typically happen outside of individual classrooms placement evaluation exit examination programmatic assessment and faculty evaluation Most of all the argument of this book is that creating the conditions for meaningful college writing assessment hinges not only on understanding the history and theories informing assessment practice but also on composition programs availing themselves of the full range of available assessment practices *Creating and Evaluating an Interdisciplinary Writing Program* Matthew William Segard,2004 **Beyond Outcomes** Richard Haswell,2001-05-30 Writing assessment programs help place entering and mid career students in composition courses at the appropriate level monitor the progress of those students and assist in placing them in writing courses throughout their undergraduate careers These same universities also have writing instruction programs which might include writing centers writing across the curriculum initiatives and freshman and advanced composition programs At many institutions though writing assessment is not necessarily considered fundamental to writing instruction and there is little communication between the assessment program and the composition program This book demonstrates that writing assessment and instruction programs may be successfully integrated The contributors analyze the development of the writing assessment and instruction program at Washington State University which is nationally recognized for its success In doing so they provide guidance to other institutions planning to develop similar integrated programs The volume argues that writing assessment and instruction should inform and influence each other that they should evolve together and that they should be developed locally By tracing the success of the WSU program the authors directly challenge the use of national packaged assessment programs such as standardized placement tests **WPA, Writing Program Administration** ,2006 **Strengthening Programs for Writing Across the Curriculum** Susan H. McLeod,1988 **A Program Development Handbook for the Holistic Assessment of Writing** Norbert Elliot,Maximino Plata,Paul Zelhart,1990-02-16 This book is a major breakthrough for developers of writing assessment programs who must certify the writing competency of undergraduate students Legislators and accreditation boards across the nation have called for and implemented large scale projects to measure educational outcomes This single source provides comprehensive information on the history underlying concepts and process of conducting a large scale writing assessment program at a specific institution of higher education The handbook opens with an analysis of the rationale for the assessment of writing during the junior year of the undergraduate curriculum The authors then turn to a case study of the success of their own institutional wide assessment program A history is provided of 20th century writing assessment practices as well attention is given to defining levels of literacy After describing an assessment process model discussion turns to the design of questions the administration of the assessment the rating of papers and the statistical analysis of data Attention is also given to the design of a course for those who are unsuccessful on the assessment

The study closes with directions for further research and over 200 references in the bibliography
