**Events And Semantic Architecture:**

   **Events and Semantic Architecture** Paul M. Pietroski,2005 This book explores how grammatical structure is related to meaning The meaning of a phrase clearly depends on its constituent words and how they are combined But how does structure contribute to meaning in natural language Does combining adjectives with nouns as in brown dog differ semantically from combining verbs with adverbs as in barked loudly What is the significance of combining verbs with names and quantificational expressions as in Fido chased every cat Inaddressing such questions Paul Pietroski develops a novel conception of linguistic meaning according to which the semantic contribution of combining expressions is simple and uniform across constructions Drawing on work at the heart of contemporary debates in linguistics and philosophy the author argues that Donald Davidson s treatment of action sentences as event descriptions should be viewed as an instructive special case of a more general semantic theory The unified theory covers a wide range of examples including sentences that involve quantification plurality descriptions of complex causal processes and verbs that take sentential complements Professor Pietroski also provides freshways of thinking about much discussed semantic generalizations that seem to reflect innately determined aspects of human languages Designed to be accessible to anyone with a basic knowledge of elementary logic Events and Semantic Architecture will interest a wide range of scholars in linguistics philosophy and cognitive science

   21st-Century Philosophy of Events Sergio Genovesi,Marta Cassina,James Bahoh,2025-08-31 The concept of event has held a prominent position in both analytic and continental philosophy since the middle of the 20th century And yet until recently the division between these two traditions resulted in their respective theories of events rarely coming into contact However early 21st century philosophy has been marked by a concerted effort by many to move beyond the analytic continental divide Explaining the nature of events their place in reality and their significance in the world has become a major problem around which segments of this work coalesce This book draws together current philosophers to reframe existing debates on events within a post divide pluralism to recalibrate the theory of events based on recent ontology and metaphysics and to advance the philosophy of events It includes as an appendix a previously unpublished piece on the topic of events by the late Jean Luc Nancy       **The Semantic Web: ESWC 2013 Satellite Events** Philipp Cimiano,Miriam Fernández,Vanessa Lopez,Stefan Schlobach,Johanna Völker,2013-09-15 This book constitutes the thoroughly refereed post proceedings of the satellite events of the10th International Conference on the Semantic Web ESWC 2013 held in Montpellier France in May 2013 The volume contains 44 papers describing the posters and demonstrations 10 best workshop papers selected from various submissions and four papers of the AI Mashup Challenge The papers cover various aspects on the Semantic Web       **Linguistic and Philosophical Perspectives about Reference** Ana Clara Polakof,2025-11-13 Bringing varied perspectives on problems related to reference from philosophers of language and linguists this edited collection initiates a dialogue between the two fields The contributors to this volume both philosophers and linguists answer four

questions What is reference Is there reference to the abstract Is there sentential reference Is there reference to time Each chapter is followed by two responses A linguist will comment on what the philosopher said and how it can impact the research made in the related linguistic field while a philosopher will comment on what the linguist said in a similar sort of fashion Edited by Ana Clara Polakof Linguistic and Philosophical Perspectives about Reference highlights ways that linguistics and philosophy of language are currently closely connected and can mutually benefit from sustained interaction
