

Abstractly: An Introduction

Students demonstrate an understanding of congruence by proving triangle congruence using each of the methods after first identifying the principle of congruence. The list of congruence theorems is provided, students write down the criteria themselves, illustrating each one. The typical congruence theorems are then highlighted using each theorem and given the conditions that require writing each theorem. Students then provide examples of how to use each theorem to prove triangle congruence. Students are then given a set of conditions and asked to identify which theorem would apply. Students are then given a set of conditions and asked to write a proof that two triangles are congruent.

Students identify the conditions for each congruence theorem as required. Students write the conditions for each theorem in the following table:

Triangle congruence criteria:

SSS: Side-Side-Side SAS: Side-Angle-Side ASA: Angle-Side-Angle

Triangle congruence criteria:

AAS: Angle-Angle-Side HL: Hypotenuse-Leg AA: Angle-Angle
