*Practicing Critical Pedagogy* Mary Frances Agnello, William Martin Reynolds, 2015-12-22 This edited text recaptures many of Joe L Kincheloe's national and international influences. An advocate and a scholar in the social, historical, and philosophical foundations of education, he dedicated his professional life to his vision of critical pedagogy. The authors in this volume found mentorship as well as kinship in Joe and express the many ways in which he and his work made profound differences in their work and lives. Joe's research always pushed the limits of what critically reflective and informed teaching entailed, never diluting the import of comprehending the complexity of sociopolitical, cultural, economic, and educational discourses and practices. Dedicated to a praxis of social and political activism rooted in students' development as citizens and workers, the labor of teachers as action researchers, cultural workers, and social mediators is always at the heart of all he achieved. We, who were so influenced directly and indirectly by him, knew his genius and relished the generosity with which he shared his ideas, advice, encouragement, and art. The world is better because of Joe L Kincheloe's scholarship, inextricably related to critical thinking and enactment of education that tenaciously interrupts complacency, mediocrity, always responding thoughtfully to particular educational contexts.

**Breaking the Exclusion Cycle** Ana Bracic, 2020-03-24 Why does social exclusion persist and what can one do to stop it? This book proposes a theory of how individual behavior contributes to social exclusion, a novel method for measuring that behavior, and solutions to ending it. Based on original fieldwork among Central and Eastern European Roma, the largest ethnic minority in Europe yet still very understudied and non-Roma, Ana Bracic develops a theory she calls the exclusion cycle through which anti-minority culture gives rise to discrimination by members of the majority, and minority members develop survival strategies. Members of the majority resent these strategies, assuming that they are endemic to the minority group rather than an outcome of their own discriminatory behavior.
