Functional Analysis And Economic Theory:

Functional Analysis and Economic Theory Yuri Abramovich, Evgenios Avgerinos, Nicholas C. Yannelis, 2012-12-06 In July of 1996 the conference Nonlinear Analysis and its Applications in Engineering and Economics took place on the Greek island of Samos the birthplace of Pythagoras During this conference a special session was held on the occasion of the 50 birthday of the well known mathematician and mathematical economist Professor Charalambos Aliprantis who by his numerous friends is usually called Roko The story behind this nickname is not quite clear yet it will be investigated further and will be made public prior to his 60 birthday At this moment we have already found out that it has nothing to do with the famous movie Rocco and his Brothers even though Roko does have two brothers Roko was born on the Greek island of Cephalonia on May 12 1946 and his elementary and secondary school education took place there At 18 he entered the Mathematics Department at the University of Athens Upon graduation from the University of Athens he proceeded with his graduate studies at Cal tech where in 1973 he completed his Ph D degree in Mathematics under the supervision of Professor W A J Luxemburg His research career can be divided into two periods The first one till 1981 was devoted entirely to pure mathematics The other one after 1981 has been subdivided between pure mathematics and mathematical economics The main objects of Roko's work in pure mathematics are spaces with order structure Riesz spaces and operators acting on them

On the Relevance of Functional Analysis to Economic Theory M. Ali Khan, 1992 *Real Analysis with Economic Applications* Efe A.

Ok, 2011-09-05 There are many mathematics textbooks on real analysis but they focus on topics not readily helpful for studying economic theory or they are inaccessible to most graduate students of economics *Real Analysis with Economic Applications* aims to fill this gap by providing an ideal textbook and reference on real analysis tailored specifically to the concerns of such students The emphasis throughout is on topics directly relevant to economic theory In addition to addressing the usual topics of real analysis this book discusses the elements of order theory convex analysis optimization correspondences linear and nonlinear functional analysis fixed point theory dynamic programming and calculus of variations Efe Ok complements the mathematical development with applications that provide concise introductions to various topics from economic theory including individual decision theory and games welfare economics information theory general equilibrium and finance and intertemporal economics Moreover apart from direct applications to economic theory his book includes numerous fixed point theorems and applications to functional equations and optimization theory The book is rigorous but accessible to those who are relatively new to the ways of real analysis The formal exposition is accompanied by discussions that describe the basic ideas in relatively heuristic terms and by more than 1 000 exercises of varying difficulty This book will be an indispensable resource in courses on mathematics for economists and as a reference for graduate students working on economic theory

Functional Analysis, Optimization, and Mathematical Economics Leonid Vital'evich Kantorovich, 1990 This is a collection of papers on the work of Leonid Kantorovich a Russian mathematician and economist

and a leading contributor to the fields of optimization and mathematical economics Kantorovich invented linear programming then applied this theory to optimal macroeconomic planning in a socialist economy for which he received the Nobel Prize The book is dedicated to the memory of Kantorovich who died in 1986 It contains original contributions from several researchers in the USSR never before available in the U S It is organized in a logical sequence from mathematics to the applications of the theories to concrete problems The work is fully illustrated

An Introduction to Mathematical Analysis for Economic Theory and Econometrics Dean Corbae, Maxwell Stinchcombe, Juraj Zeman, 2009-03-09 Dean Corbae Maxwell B

Mathematical Methods of Game and Economic Theory J.-P. Aubin, 1982-07-01 This book presents a unified treatment of optimization theory game theory and a general equilibrium theory in economics in the framework of nonlinear functional analysis It not only provides powerful and versatile tools for solving specific problems in economics and the social sciences but also serves as a unifying theme in the mathematical theory of these subjects as well as in pure mathematics itself
