Functional Architecture, 1990 **Functional Architecture** Gabriele Leuthäuser, 1990 **Bibliographic Guide to Art and Architecture** New York Public Library. Art and Architecture Division, 1994 **Exhibiting the Foreign on U.S. Soil** Kathleen Berrin, 2021-07-21 The uneasy relationship between the arts US art museums and the federal government has not been thoroughly explored by scholars This book focuses on the development of national diplomacy exhibitions during World War II and the early Cold War and explains how the War provided the government with an impetus to create a national arts policy It discusses how national diplomacy exhibitions on US soil were deployed as persuasive tools to influence public opinion to reconcile discrepancies between high art and democracy and to resolve America's lagging art status and difficulties with the foreign The type of soft diplomacy that art museums provide by initiating national diplomacy exhibitions has not received emphasis in the scholarly community and art museums have essentially been ignored in cultural studies of the early Cold War Scholarly analysis of museum exhibitions in the last quarter of the 20th century is now a popular topic but investigations of exhibitions between 1939-1960 have been thin By scrutinizing major exhibitions during those formative years this book takes a new perspective and examines the foundational development of the so-called blockbuster exhibition stimulated by World War II The book will interest readers in visual studies history museums cultural affairs government and international diplomacy [Making Dystopia](#) James Stevens Curl, 2018-08-23 In *Making Dystopia* distinguished architectural historian James Stevens Curl tells the story of the advent of architectural Modernism in the aftermath of the First World War its protagonists and its astonishing almost global acceptance after 1945 He argues forcefully that the triumph of architectural Modernism in the second half of the twentieth century led to massive destruction the creation of alien urban landscapes and a huge waste of resources Moreover the coming of Modernism was not an inevitable seamless evolution as many have insisted but a massive unparalleled disruption that demanded a clean slate and the elimination of all ornament decoration and choice Tracing the effects of the Modernist revolution in architecture to the present Stevens Curl argues that with each passing year so-called iconic architecture by supposed star architects has become more and more bizarre unsettling and expensive ignoring established contexts and proving to be stratospherically remote from the aspirations and needs of humanity In the elite world of contemporary architecture form increasingly follows finance and in a society in which the haves have more and more and the have-nots are ever more marginalized he warns that contemporary architecture continues to stack up huge potential problems for the future as housing costs spiral out of control resources are squandered on architectural bling and society fractures This courageous passionate deeply researched and profoundly argued book should be read by everyone concerned with what is around us Its combative critique of the entire Modernist architectural project and its apologists will be highly controversial to many But it contains salutary warnings that we ignore at our peril And it asks awkward questions to which answers are long overdue **Functional architecture**, 1990 *Guide to the*
