Smith, 2002 Titanium in Medicine Donald Maxwell Brunette, 2001 This comprehensive book provides state of the art scientific and technical information in a clear format and consistent structure making it suitable for formal course work or self instruction The authors are drawn not only from academic institutions but also from industry so that practical aspects of implant fabrication and material handling are covered that are often lacking in biomaterials texts Besides readers with a general interest in biomaterials the book will interest materials investigators surgeons and dentists using titanium implants medical scientists and engineers as well as lecturers at universities or institutes who would benefit by having ready access to authoritative information on the use of titanium for implants devices and instruments More information <http://www.titaniuminmedicine.com> *Polymers in Medicine II* E. Chiellini, 2012-12-06 Polymers and polymer based composites have gained increasingly larger applications in medicine and surgery Presently most biomaterials applications rely on industrial substances that were initially developed by industry for non medical purposes Moreover polymers have been often used regardless of their peculiar characteristics which can be viceversa and very attractive for some specific applications In the past years we have assisted to a significative and faster development of polymer science as well as of medicine and surgery The assistance of computer aided apparatus the use of always more advanced instruments the larger interest of the academic and industrial world bring continuously new contributions to the research on biomedical and pharmaceutical use of polymers The need of a forum where these specific researchs can be presented and discussed and the success of the 1st Conference on Polymers in Medicine held in Porto

Cervo in 1982 have encouraged the Editors to plan a periodical meeting focused on polymers and composites to be held every odd year. This book contains papers selected by an International Scientific Committee among those presented at the 2nd International Conference on Polymers in Medicine, Biomedical and Pharmaceutical Applications held in Capri, Italy, 3-7 June 1985. In addition to contributed papers, several Authors were invited to present the state of the art as well as their personal contribution on specific key arguments. The level of all contributions was high, the participation well qualified, and the meeting interesting and hopefully pleasant.
