Urban and Maritime Transport XXVII G. Passerini, S. Ricci, 2021-09-01 Better urban transport systems and the need for a healthier environment are continuous requirements that create a fertile atmosphere for original ideas innovative approaches and applications of advanced technologies their tests and evaluations in practice Moreover there is a growing need for integration with IT systems and applications to improve safety and efficiency Meanwhile the substantial growth of maritime shipping has resulted in large transported quantities around the world creating a demand for innovative solutions for ports and fleets The apparently parallel topics of Urban Transport and Maritime Transport meet in the transport and environmental management of coastal cities both being affected positively and negatively by landslide and seaside traffic Maritime Transport is highly interconnected with rail road and air services as well as inland waterways Each of these must therefore operate complimentary of one another to maximise efficiency and respond rapidly to variable economic and political contingencies The variety of topics covered in this volume reflects the complex interaction of transport systems with their environment and the need to establish integrated strategies The goal is to arrive at optimal socio economic solutions while reducing the negative environmental impacts of transportation systems typically by interdisciplinary approaches

Handbook of Public Transport Research Graham Currie, 2021-04-30 Providing a comprehensive overview and analysis of the latest research in the growing field of public transport studies this Handbook looks at the impact of urbanisation and the growth of mega cities on public transport Chapters examine the significant challenges facing the field that require new and original solutions including congestion and environmental relief and the social equity objectives that justify public transport in cities
