Joseph Sweetman Ames,2016-11-22 Excerpt from Text Book of General Physics for High Schools and Colleges The Ether A careful study of the phenomena of light led philosophers many years ago to the belief that there is present in space another medium for phenomena than that furnished by ordinary matter As we shall see later there is every reason for believing that throughout the vast regions of space in the solar system and beyond ordinary matter is absent except in certain cases as thin atmospheres around the planets and stars it is also known that the sensation which we call light is due to the fact that waves enter the eye therefore when one sees a star one has evidence that waves have left the star and have crossed space void of ordinary matter There must be present then in this space a medium that can carry waves it is called the ether sometimes and its properties will be discussed more fully in what follows Similarly in order to explain many electrical and magnetic phenomena it was necessary to assume the existence of a medium different from ordinary matter and one of the great achievements of the last century was the proof that this medium was the ether There is moreover at present no evidence of the existence in our universe of any other media than ordinary matter and the ether About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving
