

Time and space generalized diffusion equation on graph/networks

Fernando Diaz-Diaz and Ernesto Estrada
*Institute of Cross-Disciplinary Physics and Complex Systems,
IFISC (UIB-CSIC), 07122 Palma de Mallorca, Spain*

Normal and anomalous diffusion are ubiquitous in many complex systems [1]. Here, we define a time and space generalized diffusion equation (GDE), which uses fractional-time derivatives and transformed d -path Laplacian operators on graphs/networks. We find analytically the solution of this equation and prove that it covers the regimes of normal, sub- and superdiffusion as a function of the two parameters of the model. We extend the GDE to consider a system with temporal alternancy of normal and anomalous diffusion which can be observed for instance in the diffusion of proteins along a DNA chain. We perform computational experiments on a one-dimensional system emulating a linear DNA chain. It is shown that a subdiffusive-superdiffusive alternant regime allows the diffusive particle to explore more slowly small regions of the chain with a faster global exploration, than a subdiffusive-subdiffusive regime. Therefore, an alternancy of sliding (subdiffusive) with hopping and intersegmental transfer (superdiffusive) mechanisms show important advances for protein-DNA interactions.

1. INTRODUCTION

Diffusion—the net movement of particles in an environment, generally from a region of higher concentration to a region of lower concentration—is ubiquitous in natural and man-made systems. In the absence of obstacles to diffusion and traps, the diffusive particles describe a random walk motion on the environment, such that their mean squared displacements (MSD) scale linearly with time, $\langle x^2 \rangle \propto t$. This process is known as normal diffusion. However, the existence of obstacles in the environment may trigger long-jumps of the diffusive particle [2–4], such that the mean displacement of the particles is bigger than that of the normally diffusing ones in the same period of time, i.e., $\langle x^2 \rangle \propto t^{\gamma > 1}$. This type of process is known as superdiffusive. On the other hand, it is possible that the environment has regions acting as traps for the particles, where they are retained for longer times than in a normal diffusive process. In this case, $\langle x^2 \rangle \propto t^{\gamma < 1}$, and the process is known as subdiffusive. From the modeling perspective there are several approaches to describe anomalous (sub- and super-) diffusion [5, 6]. From a physical perspective these processes have analogues in terms of anomalous heat conduction [7], where normal diffusion implies normal heat conduction, superdiffusion implies anomalous heat conduction with a divergent thermal conductivity and subdiffusion implies anomalous heat conduction with a convergent thermal conductivity. In the last case the system is a thermal insulator in the thermodynamic limit.

It has been remarked that subdiffusion may arise as the result of the coexistence of time-periods dominated by normal transport with periods in which there is no effective transport. The last can emerge when the diffusive particle is temporarily trapped as a result of geometrical complexity and interactions with the environment. This could be clearly the case of the travel of contaminants in groundwater, which display much longer times than the ones expected from the classic diffusion. The motion of proteins while sliding on DNA during target search is believed to be subdiffusive in general [8]. Simulations results for the case of T7 RNA polymerase promoter search on T7 DNA has been found to be subdiffusive for short times and asymptotically approaching normal diffusion [9]. More recent intensive computational simulations also pointed out the important role of subdiffusive process in the diffusive search of proteins for their specific binding sites on DNA in the presence of the macromolecular crowding in cells [10]. Nowadays it is well established that the molecular crowding of the internal cellular environment induces the emergence of anomalous subdiffusion of cytoplasmic macromolecules. This has been verified by means of fluorescence correlation spectroscopy and computer simulations [11], fluorescence correlation spectroscopy [12], and by tracking fluorescently labeled mRNA molecules [13]. The complexities of the process where studied with globular proteins dispersed in aqueous solution of poly(ethylene oxide) (PEO) to mimic a crowded environment. Using state-of-the-art neutron spin echo (NSE) and small-angle neutron scattering (SANS) techniques it was observed a fast dynamic corresponding to diffusion inside a trap built by the polymer mesh with slower process corresponding to the long time diffusion on macroscopic length scales [14]. It has also been found that water molecules jump randomly between trapping sites on protein surfaces, giving rise to subdiffusion. At longer times the subdiffusive exponent gradually increases towards normal diffusion due to a many-body volume-exclusion effect [15].

The intermittency of fast and slow processes as the one described by the globular proteins in a crowded environment [14] can also be found in other scenarios. For instance, it has been reported that a proliferating, diffusing tumor within different surrounding tissue conditions migrates not only by using normal diffusion, but also using combinations of subdiffusion, superdiffusion, and even ballistic diffusion, with increasing mobility of the tumor cell when haptotaxis

Generalized Diffusion Operators

Generalized Diffusion Operators:

Generalized Diffusion Operators Jörg-Uwe Löbus,1993 Generalized Diffusion Operators Jörg-Uwe Löbus,1993-09-15 **Issues in General and Specialized Mathematics Research: 2013 Edition** ,2013-05-01 Issues in General and Specialized Mathematics Research 2013 Edition is a ScholarlyEditions book that delivers timely authoritative and comprehensive information about General Mathematics The editors have built Issues in General and Specialized Mathematics Research 2013 Edition on the vast information databases of ScholarlyNews You can expect the information about General Mathematics in this book to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Issues in General and Specialized Mathematics Research 2013 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com>

Stochastic Processes and Related Topics Jeff Englebert,1996-02-09 The aim of this volume is to make accessible to a greater audience papers given at the 10th Winterschool on Stochastic Processes in Siegmundsburg Germany March 1994 The papers include developments in stochastic analysis applications to finance mathematics Markov processes and diffusion processes stochastic differential equations and stochastic partial differential equations

Analysis, Probability And Mathematical Physics On Fractals Patricia Alonso Ruiz,Joe Po-chou Chen,Luke G Rogers,Alexander Teplyaev,2020-02-26 In the 50 years since Mandelbrot identified the fractality of coastlines mathematicians and physicists have developed a rich and beautiful theory describing the interplay between analytic geometric and probabilistic aspects of the mathematics of fractals Using classical and abstract analytic tools developed by Cantor Hausdorff and Sierpinski they have sought to address fundamental questions How can we measure the size of a fractal set How do waves and heat travel on irregular structures How are analysis geometry and stochastic processes related in the absence of Euclidean smooth structure What new physical phenomena arise in the fractal like settings that are ubiquitous in nature This book introduces background and recent progress on these problems from both established leaders in the field and early career researchers The book gives a broad introduction to several foundational techniques in fractal mathematics while also introducing some specific new and significant results of interest to experts such as that waves have infinite propagation speed on fractals It contains sufficient introductory material that it can be read by new researchers or researchers from other areas who want to learn about fractal methods and results

Computer Vision in Control Systems-3 Margarita N. Favorskaya,Lakhmi C. Jain,2017-10-25 The research book is a continuation of the authors previous works which are focused on recent advances in computer vision methodologies and technical solutions using conventional and intelligent paradigms The book gathers selected contributions addressing aerial and satellite image processing and

related fields Topics covered include novel tensor and wave models a new comparative morphology scheme warping compensation in video stabilization image deblurring based on physical processes of blur impacts and a rapid and robust core structural verification algorithm for feature extraction in images and videos among others All chapters focus on practical implementations Given the tremendous interest among researchers in the development and applications of computer vision paradigms in the field of business engineering medicine security and aviation this book offers a timely guide

Sūgaku Expositions, 2000

Recent Developments in Fractals and Related Fields Julien Barral, Athanasios Batakis, Stéphane Seuret, 2025-04-18 This volume provides readers with an overview of the most recent developments in the mathematical fields related to fractals It includes both original research contributions as well as surveys from many of the leading experts on modern fractal geometry theory and applications The contributions contained in the book stem from the conference Fractals and Related Fields IV that was held in 2022 on the Island of Porquerolles France Various aspects of fractal geometry in connection with harmonic analysis geometric measure theory ergodic theory and dynamical systems probability theory number theory functional analysis additive combinatorics embedding theory and signal and image processing are addressed within its pages We hope that the book will be interesting for pure and applied mathematicians in these areas as well as for other researchers curious to discover more about fractals

Journal of mathematics of Kyoto University Kyōto Daigaku, 1987

In Memoriam Marc Yor - Séminaire de Probabilités XLVII Catherine Donati-Martin, Antoine Lejay, Alain Rouault, 2015-09-07 This volume is dedicated to the memory of Marc Yor who passed away in 2014 The invited contributions by his collaborators and former students bear testament to the value and diversity of his work and of his research focus which covered broad areas of probability theory The volume also provides personal recollections about him and an article on his essential role concerning the Doeblin documents With contributions by P Salminen J Y Yen J Warren T Funaki J Pitman J F Le Gall L Alili P Graczyk K Yano D Bakry A Aksamit T Choulli J Pitman J Obloj P Spoida P Biane J Najnudel P Fitzsimmons Y Le Jan L C G Rogers E Azmoodeh G Peccati P Baldi N Demni A Rouault N O Connell N Ikeda A Comtet P Bougerol L Chaumont L Devroye D Stroock and M Emery

Fractals in Graz 2001 Peter J. Grabner, Wolfgang Woess, 2003 This book contains the proceedings of the conference Fractals in Graz 2001 Analysis Dynamics Geometry Stochastics that was held in the second week of June 2001 at Graz University of Technology in the capital of Styria southeastern province of Austria The scientific committee of the meeting consisted of M Barlow Vancouver R Strichartz Ithaca P Grabner and W Woess both Graz the latter two being the local organizers and editors of this volume We made an effort to unite in the conference as well as in the present proceedings a multitude of different directions of active current work and to bring together researchers from various countries as well as research fields that all are linked in some way with the modern theory of fractal structures Although or because in Graz there is only a very small group working on fractal structures consisting of non insiders we hope to have been successful with this program of wide horizons All papers were

written upon explicit invitation by the editors and we are happy to be able to present this representative panorama of recent work on potential theory random walks spectral theory fractal groups dynamic systems fractal geometry and more The papers presented here underwent a refereeing process Journal of analysis and its applications ,1982 JMSJ Nihon Sūgakkai,1988 Probabilistic Methods in Mathematical Physics Kiyosi Itō,Nobuyuki Ikeda,1987 *Journal of the Korean Mathematical Society* ,1998 Spectral Theory of Indefinite Krein-Feller Differential Operators Andreas Fleige,1996-08-15 The vibration of a string with a nondecreasing mass distribution function m leads to a generalized differential equation of second order introduced by Krein and by Feller The author allows also nonmonotonic functions m and hence gets into the theory of indefinite inner product spaces Here at the first time a systematic presentation of the generalized differential expression and of J selfadjoint operator realizations is given Developing a spectral theory for such Krein Feller operators the author derives the most general known criteria for the regularity of the critical point infinity Then by specialization expansion theorems for wide classes of indefinite second order differential and difference operators are obtained Mathematical Reviews ,2008 *Proceedings of RIMS Workshop on Stochastic Analysis and Applications* ,2008 *Physical Review* ,1999-03 Publishes papers that report results of research in statistical physics plasmas fluids and related interdisciplinary topics There are sections on 1 methods of statistical physics 2 classical fluids 3 liquid crystals 4 diffusion limited aggregation and dendritic growth 5 biological physics 6 plasma physics 7 physics of beams 8 classical physics including nonlinear media and 9 computational physics **Advances in Optical Imaging and Photon Migration** James G. Fujimoto,Michael S. Patterson,1998

Generalized Diffusion Operators Introduction

Generalized Diffusion Operators Offers over 60,000 free eBooks, including many classics that are in the public domain. Open Library: Provides access to over 1 million free eBooks, including classic literature and contemporary works. Generalized Diffusion Operators Offers a vast collection of books, some of which are available for free as PDF downloads, particularly older books in the public domain. Generalized Diffusion Operators : This website hosts a vast collection of scientific articles, books, and textbooks. While it operates in a legal gray area due to copyright issues, its a popular resource for finding various publications. Internet Archive for Generalized Diffusion Operators : Has an extensive collection of digital content, including books, articles, videos, and more. It has a massive library of free downloadable books. Free-eBooks Generalized Diffusion Operators Offers a diverse range of free eBooks across various genres. Generalized Diffusion Operators Focuses mainly on educational books, textbooks, and business books. It offers free PDF downloads for educational purposes. Generalized Diffusion Operators Provides a large selection of free eBooks in different genres, which are available for download in various formats, including PDF. Finding specific Generalized Diffusion Operators, especially related to Generalized Diffusion Operators, might be challenging as theyre often artistic creations rather than practical blueprints. However, you can explore the following steps to search for or create your own Online Searches: Look for websites, forums, or blogs dedicated to Generalized Diffusion Operators, Sometimes enthusiasts share their designs or concepts in PDF format. Books and Magazines Some Generalized Diffusion Operators books or magazines might include. Look for these in online stores or libraries. Remember that while Generalized Diffusion Operators, sharing copyrighted material without permission is not legal. Always ensure youre either creating your own or obtaining them from legitimate sources that allow sharing and downloading. Library Check if your local library offers eBook lending services. Many libraries have digital catalogs where you can borrow Generalized Diffusion Operators eBooks for free, including popular titles. Online Retailers: Websites like Amazon, Google Books, or Apple Books often sell eBooks. Sometimes, authors or publishers offer promotions or free periods for certain books. Authors Website Occasionally, authors provide excerpts or short stories for free on their websites. While this might not be the Generalized Diffusion Operators full book , it can give you a taste of the authors writing style. Subscription Services Platforms like Kindle Unlimited or Scribd offer subscription-based access to a wide range of Generalized Diffusion Operators eBooks, including some popular titles.

FAQs About Generalized Diffusion Operators Books

1. Where can I buy Generalized Diffusion Operators books? Bookstores: Physical bookstores like Barnes & Noble,

- Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
 3. How do I choose a Generalized Diffusion Operators book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
 4. How do I take care of Generalized Diffusion Operators books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
 5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
 6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
 7. What are Generalized Diffusion Operators audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
 8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
 9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
 10. Can I read Generalized Diffusion Operators books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
