The Generative Study of Second Language Acquisition Suzanne Flynn, Gita Martohardjono, Wayne O'Neil, 2014-01-14 The vast majority of work in theoretical linguistics from a generative perspective is based on first language acquisition and performance The vast majority of work on second language acquisition is carried out by scholars and educators working within approaches other than that of generative linguistics In this volume this gap is bridged as leading generative linguists apply their intellectual and disciplinary skills to issues in second language acquisition The results will be of interest to all those who study second language acquisition regardless of their theoretical perspective and all generative linguists regardless of the topics on which they work

[Generative Second Language Acquisition](#) Roumyana Slabakova, Tania Leal, Amber Dudley, Micah Stack, 2020-09-24 Most human beings grow up speaking more than one language a lot of us also acquire an additional language or languages other than our mother tongue This

Element in the Second Language Acquisition series investigates the human capacity to learn additional languages later in life and introduces the seminal processes involved in this acquisition The authors discuss how to analyze learner data and what the findings tell us about language learning critically assessing a leading theory of how adults learn a second language

Generative SLA This theory describes both universal innate knowledge and individual experiences as crucial for language acquisition This Element makes the relevant connections between first and second language acquisition and explores whether they are fundamentally similar processes Slabakova et al provide fascinating pedagogical questions that encourage students and teachers to reflect upon the experiences of second language learners

papers report on controlled experimental studies within specific areas of research investigating the development of L2 grammars others formulate exciting new proposals for methodology and learnability in both first and second language acquisition Following an introduction which argues for new research strategies that focus on the process of acquisition along with its product the book is divided into two sections Current Perspectives includes compelling new work on the development

of functional categories within a parameter setting model of L2 acquisition the second section New Directions introduces research and discussion on topics which reflect the latest developments in the field including syntax semantics correspondences L2 processing research code switching from a UG perspective and applications of Chomsky's 1995 Minimalist Program to second language acquisition studies

Language Acquisition Studies in Generative Grammar Kenneth Wexler, Teun Hoekstra, Bonnie D. Schwartz, 1994 This is a collection of essays on the native and non native acquisition of syntax within the Principles and Parameters framework In line with current methodology in the study of adult grammars language acquisition is studied here from a comparative perspective The unifying theme is the issue of the initial state of grammatical knowledge For native language the important controversy is that between the Continuity approach which holds that Universal Grammar is essentially constant throughout development and the Maturation approach which maintains that portions of UG are subject to maturation For non native language the theme of initial states concerns the extent of native grammar influence Different views regarding the continuity question are defended in the papers on first language acquisition Evidence from the acquisition of inter alia Bernese Dutch English Finnish French German Icelandic Italian and Japanese is brought to bear on issues pertaining to clause structure null subjects verb position negation Case marking modality non finite sentences root questions long distance questions and scrambling The views defended on the initial state of adult second language acquisition also differ from complete L1 influence to different versions of partial L1 influence While the target language is German in these studies the native language varies Korean Spanish and Turkish Analyses invoke UG principles to account for verb placement null subjects verbal morphology and Case marking Though many issues remain the volume highlights the growing ties between formal linguistics and language acquisition research Such an approach provides the foundation for asking the right questions and putting them to empirical test

Second Language Acquisition Roumyana Slabakova, 2016-04-15 This textbook approaches second language acquisition from the perspective of generative linguistics Roumyana Slabakova reviews and discusses paradigms and findings from the last thirty years of research in the field focussing in particular on how the second or additional language is represented in the mind and how it is used in communication The adoption and analysis of a specific model of acquisition the Bottleneck Hypothesis provides a unifying perspective The book assumes some non technical knowledge of linguistics but important concepts are clearly introduced and defined throughout making it a valuable resource not only for undergraduate and graduate students of linguistics but also for researchers in cognitive science and language teachers
