Hapke, 2005-01-05 The scale of this book encompasses vast continents and global forces but often its descriptive focus on individual lives has the most impact Stories of people and families make the study of geography compelling Students begin to grasp the complex patterns at work in the world today as they see how people are affected by and respond to economic social and political processes Through these stories of individual lives the authors hope to convey the impact of globalization a major theme of the text To highlight global to local and interregional connections the text includes a number of topics that have no borders the war on terrorism realignments in the global political order interregional trade the global economy popular culture the environment and the Internet Here again the focus on the individual person provides insight offering local perspectives on these global trends Preface **Essentials of World Regional Geography** George White, Joseph Dymond, Elizabeth Chacko, Michael Bradshaw, 2010-03-29 This shorter version of the highly successful Contemporary World Regional Geography 3e gives readers a fresh new approach that combines fundamental geographical elements internal regional diversity and contemporary issues This approach allows serious discussion of cultural and environmental issues as well as political and economic issues The main innovation in this completely rewritten text is in the ordering of the material covered While other texts cut photos illustrations and boxed material from their WRG books this essentials version is a completely rewritten text by the authors of Contemporary World Regional Geography 3e Each of the nine regional chapters opens with a one or two page map of the region short accounts of people or events to provide a personal flavor of the region an outline of the chapter contents and a short section placing the region in its wider global context Each regional chapter is consistently organized by three sections The first section summarizes the distinctive physical and human geographies of the region the second section explores the internal diversity of the region at subregional selected country and local levels The third section focuses on a selection of contemporary issues

that are important to the people of each region and frequently have implications for the rest of the world Each regional chapter follows the same framework allowing students to easily make comparisons from one world region to the next Students are encouraged to consider what it means to be part of a global community and to develop their geographical understandings of world events The authors have created a text that is readable with a consistent structure within chapters containing superior maps and illustrations and finally to offer a concise and more affordable text
