Tips for Correct Calculations:

Make sure that all measurements are in the same units. If necessary, convert between units.

- In most cases, it is best to convert a larger unit to smaller units (e.g. convert grams to milligrams). This conversion uses multiplication and most often keeps the calculation in whole numbers.

- Always check for reasonableness of your answer. Does the drug dosage make sense? (Amounts less than half a tablet or greater than 3 tablets are not common, but still possible.)

Formula: $D/H * Q=X$ **Desired/Have * Quantity=X**
