

The Feminism Theory in Modern Society

Topic: **Sociology** | Words: 624 | Pages: 2

Women perform significant social, work, and parenting functions on an equal basis with men. However, in some cases, they barely have the same rights and freedoms as men do (Feminism is for everybody). I believe that even in the 21st century, we can note a tremendous gap between men and women in various fields. Development and utilization of the theory of feminism on our modern world structure have a significant potential to make it more flexible, comprehensive, and holistic. Activities on this topic sufficiently indicate the nature, prerequisites, and possible ways of resolving a severe social conflict remaining to our day.

It cannot be precisely stated that the theory has one general tendency in common. There are many varying forms and directions, including a different set of goals and united by overall feminine strength and influence. These feminist flows often overlap with each other and complement the comprehensive representation. Topics covered by feminist theory include discrimination, objectification (especially the sexual one), oppression and patriarchy, as well as stereotypes, art history, literature, and even more. It is aimed at elucidating the nature of gender inequality based on experience, social roles, and predispositions of people (Ferguson, 2017). I consider it not as the contribution to the solely female segment of society but all vulnerable groups of people. The struggle for the same rights, wages, freedom of speech, and autonomy of choice is aimed not only at personal gain but also at improving the general structure of society.
