**Mathematical Reviews**, 2005      **Minimum Impatience Theorems for Recursive Economic Models** Gerhard Sorger, 1992      Time Series and Linear Systems Sergio Bittanti, 1986      *Exogeneity in Error Correction Models* Jean-Pierre Urbain, 1993-06-14 In the recent years the study of cointegrated time series and the use of error correction models have become extremely popular in the econometric literature This book provides an analysis of the notion of weak exogeneity which is necessary to sustain valid inference in sub systems in the framework of error correction models ECMs In many practical situations the applied econometrician wants to introduce structure on his/her model in order to get economically meaningful coefficients For this purpose ECMs in structural form provide an appealing framework allowing the researcher to introduce theoretically motivated identification restrictions on the long run relationships In this case the validity of the inference will depend on a number of conditions which are investigated here In particular we point out that orthogonality tests often used to test for weak exogeneity or for general misspecification behave poorly in finite samples and are often not very useful in cointegrated systems      Econometric Models, Techniques, and Applications Michael D.
