### **Children's Rights Law in the Global Human Rights Landscape** Eva

Brems, Ellen Desmet, Wouter Vandenhoele, 2017-04-21 Children's rights law is often studied and perceived in isolation from the broader field of human rights law This volume explores the inter relationship between children's rights law and more general human rights law in order to see whether elements from each could successfully inform the other Children's rights law has a number of distinctive characteristics such as the emphasis on the best interests of the child the use of general principles and the inclusion of third parties e.g. parents and other care takers in treaty provisions The first part of this book questions whether these features could be a source of inspiration for general human rights law In part two the reverse question is asked could children's rights law draw inspiration from developments in other branches of human rights law that focus on other specific categories of rights holders such as women persons with disabilities indigenous peoples or older persons Finally the interaction between children's rights law and human rights law and the potential for their isolation inspiration or integration may be coloured or determined by the thematic issue under consideration Therefore the third part of the book studies the interplay between children's rights law and human rights law in the context of specific topics intra family relations LGBTQI marginalization migration media the environment and transnational human rights obligations

**Good Kids** Isabel Jijon, 2025-07-29 One in ten children worldwide is involved in some form of child labor While almost half are in occupations that put their safety at risk the other half have gray jobs like industrial farming or selling candy on the street Children in these positions often defend the value of their work and some even join social movements to demand the legalization of child labor In Good Kids Isabel Jijon reveals how global campaigns against child labor are often met with

resistance from the very children they are meant to protect Conducting interviews in Bolivia and Ecuador with children who defend their work Jijon explores how children give work moral not just economic value She finds that working children seek a sense of self worth as well as worthiness in their closest relationships they use work to prove that they are good sons daughters good friends or simply good kids Drawing also on interviews with reformers invested in ending child labor Jijon produces a nuanced picture of the ways that global campaigns can unintentionally undermine these relationships and make working children feel stigmatized rather than protected This fascinating and challenging study of moral meaning making upends simple understandings of harm and worthiness in a vast but poorly understood labor market Routledge International Handbook of Human Trafficking Rochelle Dalla, Donna Sabella, 2019-09-19 According to the UNODC 2015 human trafficking HT is the fastest growing means by which people are enslaved the fastest growing international crime and one of the largest sources of income for organized criminal networks It profoundly impacts the physical and mental health of victims their families and entire communities and is recognized as a crime against humanity Despite burgeoning interest education research and advocacy efforts a pinnacle handbook devoted to human trafficking and modern day slavery with global focus and multidisciplinary scope does not currently exist The Routledge International Handbook of Human Trafficking was created to fill this resource gap Divided into four sections the Handbook offers the reader a comprehensive and fresh approach via a in depth analyses and opportunities for application through case studies critical thinking questions and supplemental learning materials b multidisciplinary linkages with disciplinary overlap across each of the four sections acknowledged and highlighted and c content experts representing multiple segments of society academia government foundation law enforcement and practice and global vantage points Australia Finland Germany Netherlands South Africa Thailand and the United States Written by expert scholars service providers policy analysts and healthcare professionals this Handbook is an invaluable resource for those already working in the field as well as for students in any discipline who want to learn or learn more about HT and modern day slavery

**Texts Adopted by the Congress of Local and Regional Authorities of Europe** Congress of Local and Regional Authorities of Europe, *Sovereignty, Migration and the Law* Patricia Rushton, 2024-12-31 This book examines how states justify the creation of physical policy and legislative barriers of entry for migrants by drawing on a concept of sovereignty The movement of people across the world in search of refuge from persecution war and poverty is accelerating And as states confronted with this movement create physical policy and legislative barriers to entry they justify this exclusion by drawing on concepts of sovereignty This book interrogates that justification in an historical and theoretical context using the case study of Australian law and policy since 1900 as well as instances from other Western countries that have routinely copied from Australia But just as Australian migration policies are being replicated in the US Britain and Europe so this book argues is their employment of an anachronistic concept of sovereignty one that is reasserted precisely because of its waning power in the face of globalisation This book will be an

important resource for law and political science scholars researchers and students in the fields of migration and refugee law and policy as well as to professional policy makers government institutions lawyers and international agencies with a particular focus on those fields
