Foreign Policy Challenges:

Challenges and Opportunities Abroad Ireland. Department of Foreign Affairs, 1996 *Foreign policy challenges in the 1980s* J. Brian Atwood, 1980 **Singapore's Foreign Policy** Amitav Acharya, 2008 The conventional understanding of Singapore's foreign policy can be summarized in three main propositions first it is dictated by the imperatives of being a small state second its primary purpose is to ensure Singapore's survival given its small size and third this logic of survival dictates a realpolitik approach to foreign policy and national security This book argues that an exclusively realist view of Singapore's foreign policy is inadequate Singapore's foreign policy is also shaped by the positive effects of economic interdependence and regional institution building OCo instruments that realists tend to dismiss but which Singapore has self consciously tried to promote as instruments of regional order The book first looks at the evolution of Singapore's foreign policy before analyzing Singapore's international relations and national security in the context of economic growth and terrorism It concludes with an interesting chapter on the impact of the rise of China and India on the regional landscape

The United States confronts today s world with a foreign policy that is neither consistent enough to be called a policy nor adequately responsive to foreign threats and opportunities It is instead constructed in the marketplace of interests and not ideas that Washington has become As a result it is more likely to serve special interests rather than the national interest This has come about because the end of the Cold War globalization and political partisanship have created a dysfunctional policy process This book explores this change in U S foreign policy examines the roles of the primary actors and assesses the potential for improvement

Theories of Dependent Foreign Policy and the Case of Ecuador in the 1980s Jeanne A. K. Hey,1995

How do economic weakness and dependence influence foreign policy decisions and behavior in third world countries

Theories in Dependent Foreign Policy examines six foreign policy theories compliance consensus

counterdependence realism leader preferences and domestic politics and each is applied to a series of case studies of Ecuador's foreign policy during the 1980s under two regimes Osvaldo Hurtado 1981-1984 and his successor León Febres Cordero 1984-1988. Hey shows that Ecuador during this period represented the third world in many ways. It was a new democracy having just emerged from years of military rule, extremely indebted to the West and dependent on primary product export economy that relied heavily on importers, especially the United States. Jeanne Hey finds that some of the most popular and enduring theories in western research such as realism and compliance poorly account for Ecuadorian foreign policy. She explains that poor countries like Ecuador have substantial foreign policy latitude in the diplomatic area. Drawing on archival research and interviews with policy makers including Presidents Hurtado and Febres Cordero, Dr. Hey convincingly argues that many of the traditional foreign policy theories do not fit dependent states and inadequately account for the complexity of foreign policy in the third world.
