The book examines every aspect science technology engineering properties design processing applications of the continuing development and use of polypropylene. The unique treatment means that specialists can not only find what they want but for the first time can relate to and understand the needs and requirements of others in the product development chain. The entire work is underpinned by very extensive collections of property data that allow the reader to put the information to real industrial and commercial use. Despite the preeminence and unrivaled versatility of polypropylene as a thermoplastic material to manufacture relatively few books have been devoted to its study. Polypropylene The Definitive User's Guide and Databook not only fills the gap but breaks new ground in doing so. Polypropylene is the most popular thermoplastic in use today and still one of the fastest growing. Polypropylene The Definitive User's Guide and Databook is the complete workbook and reference resource for all those who work with the material. Its comprehensive scope uniquely caters to polymer scientists plastics engineers processing technologists product designers machinery and mold makers product managers end users researchers and students alike.

The British National Bibliography Arthur James Wells, 2005 **Plastic Films in Food Packaging** Sina Ebnesajjad, 2012-12-31 The value of the groceries purchases in the USA is over 500 billion annually most of which is accounted for by packaged foods. Plastic packaging of foods is not only ubiquitous in developed economies but increasingly commonplace in the developing world where plastic packaging is instrumental in decreasing the proportion of the food supply lost to spoilage. This new handbook is a combination of new material and updated chapters chosen by Dr Sina Ebnesajjad from recently published books on this subject. Plastic Films in Food Packaging offers a practical handbook for engineers scientists and managers working in the food packaging industry providing a tailor made package of science and engineering fundamentals best practice techniques and guidance on new and emerging technologies. By covering materials design packaging processes machinery and waste management together in one book the authors enable the reader to take a lifecycle approach to food packaging. The Handbook addresses questions related to film grades types of packages for different types of foods packaging technologies machinery and waste management. Additionally the book provides a review of new and emerging technologies. Two chapters cover the development of barrier films for food packaging and the regulatory and safety aspects of food packaging. Essential information and practical guidance for engineers and scientists working at all stages of the food packaging lifecycle from design through manufacture to recycling.
