
Net Foreign Factor income- NFFI

Net foreign factor income = US citizens income earned abroad minus foreign citizens income earned in US.

Similar to how we included imports in C, I and G in the expenditure approach and subtracted it out later, when wages, rent, interest and profit are earned it includes those values for all nationals, whether the funds are earned in the US or abroad. BUT, GDP is a measure of production within the borders. National income was income of nationals in and out of the border. SOOOOO, we have to subtract out the income of US citizens that was earned abroad. Plus income earned by foreigners working here must be added because they worked in the domestic economy. This means we have national income minus NFFI so far in our income approach to GDP.

Foreign Factor

BM King

Foreign Factor:

Thank you for downloading **Foreign Factor**. As you may know, people have search numerous times for their chosen readings like this Foreign Factor, but end up in malicious downloads.

Rather than enjoying a good book with a cup of tea in the afternoon, instead they juggled with some harmful bugs inside their computer.
