

EXPERIENTIAL LEARNING

Kolb (1984) defines experiential learning as "the process whereby knowledge is created through the transformation of experience."

DEFINITION

Experiential learning is a pedagogical method where students learn by doing something. Instead of listening to the teacher talk about how to do something, the students learn through the experience of doing the task.

It is based on the constructivist idea that we learn best through active interaction with our environments.

EXAMPLES

- Doing experiments in chemistry class.
- Learning about food by growing it in a garden.
- Learning to drive by taking driving lessons.
- Learning about animals by going on a safari.
- Becoming an apprentice to learn carpentry.
