Identifying the Main Idea

Read each paragraph and write the main idea of it.

Environment means a healthy natural balance in the air, water, animals, plants, and other natural resources. The environment influences the existence and development of an organism. Pollution is the process of creating the environment dirty by adding harmful substances thereto. Owing to indiscriminate industrialization man has created a polluted environment. To prevent these hazards from endangering human, animal and plant life measures should be taken before the situation goes out of control. More trees should be planted. Anti-pollution scientific methods should be devised. Cutting down trees should be made punishable by law. Poaching and hunting of animals for monetary gain and recreation should also be stopped.

Family is the place where you learn your first lesson in life. Your family members are the only assets that will remain with you forever. Whatever the circumstances, family members are always there for each other to support us. Good values and good morals are always taught in a family. In the family, we are prepared to respect our elders and love younger ones. We learn lessons consistently from our family, about honesty, dependability, kindness and so on. Family always provides us with a sensation of so much love and care.

The greatest wealth is our own health. A healthy body can earn great wealth but, a wealthy person cannot earn great health. We live in a fast-moving world where individuals have no time for themselves. Most part of their life withers away in search of materialistic wealth in order to outshine others but, along the way, they lose their health. Wealth matters, but, is not as important as health. Spending lots of money on junk food in five-star hotels or on other entertainment sources like watching films for a day and so on has no advantages other than self-satisfaction.
