
What is a Standardized Test?

Standardized tests are assessments that:

- are intended to be used across multiple settings
- normalize the expected test-taking conditions

Standardized tests may:

- refer to norm-referenced tests, where results are compared to percentile rankings for a pool of takers
- refer to criterion-referenced tests, where results are absolute scores (which may then be assigned levels based on scale break points)

Modern standardized tests can be computer-adaptive; they select next-question difficulty based on responses
