FOUND ACTIONSC,
BHANGAL, 2000-12-20 The stun design site constructed as the case study in Foundation ActionScript is viewable at www.friendsofed.com/extras/1903450322_stun_index.html Flash 5 is Macromedia's incredibly successful motion graphics creation package Flash 5 implements a vastly expanded and more powerful range of ActionScript components It is ActionScript

coupled with Flash's exceptional graphical facilities that makes Flash the de facto standard for interactive graphically rich web sites and applications. The new implementation makes ActionScript an even more important part of the Flash landscape. Foundation ActionScript provides a raft of new features for the Flash designer to use. To fully exploit these features the designer will need to understand a basic set of programming constructs and principles. This book will teach those principles in the Flash 5 context providing the reader with a solid base to develop more complex ActionScript skills. The book has a strong tutorial thrust focusing on building the core skills that the reader needs to master Flash ActionScript. The skills and techniques are built in self-contained chapters that combine into an ongoing case study to build a rich knowledge base in the reader's mind. What you'll learn

Who this book is for: Flash 5 beginners who've read an introductory text and need a much more in-depth introduction to ActionScript; Flash 4 users who need a fuller understanding of ActionScript as implemented in Flash 5.

Foundation ActionScript for Macromedia Flash MX Ben Renow-Clarke, Sham Bhangal, 2013-11-11. With the release of Flash MX scripting in Flash moved from being a desirable asset to an essential skill in the world of web design. ActionScript is quite simply the center of power in Flash and it's no surprise that most of the advances in Flash MX are script-centric. Flash is a design tool and ActionScript can easily scare designers. This book is for anyone who has ever looked in awe at a cutting edge Flash site then taken a look at some code and run in the other direction. Learning ActionScript with friends of ED will not turn you into a boring programmer; it will turn you into someone who finally has the power to achieve what they want with their web design. This book will take you from knowing nothing about ActionScript to a firm knowledge that will allow you to exercise a previously unimaginable amount of power over your flash movies. It does this with fully worked examples throughout and a case study that will leave you with a cutting edge Flash site by the end of the book. The book assumes no previous knowledge of code or ActionScript but does assume that you know the basics of the Flash interface and have maybe created some basic timeline based movies with tweens and so on. If you're totally new to Flash then you might want to take a look at friends of ED's acclaimed *Foundation Flash MX* or at the more visually oriented *Flash MX Express*. This is no simple re-write of the first edition of *iFoundation ActionScript*.

Foundation Flex for Developers Sas Jacobs, 2008-03-02. Flex is a very powerful and versatile technology for creating web application front ends. But what every good web application needs is a robust data source be it XML or a database. Flex is very adaptable in terms of connecting to data sources and that is the main focus of this book. In *Foundation Flex for Developers* author Sas Jacobs assumes that you've got the basics of Flex down already and explores in detail how to create professional data centric Flex 2 and Flex 3 applications. In the first half of the book she starts off with a brief exploration of Flex and ActionScript 3.0 before looking at application essentials in detail creating custom components user and web browser interactions binding formatting and validating data debugging and more. In the second half of the book the focus is on connecting Flex to data sources and covers XML LiveCycle Data Services PHP ASP NET and ColdFusion in detail via a series of step by step case studies. Advanced ActionScript 3.0 Animation Keith Peters, 2008-11-01. This book is a compilation of advanced ActionScript 3.0 animation techniques for any user creating games user interaction or motion control with ActionScript. It's an anthology of topics that follow from the author's earlier book *Foundation ActionScript 3.0 Animation Making Things Move* and things that became possible in version 10 of Flash Player. This book covers a diverse selection of topics that don't necessarily lead one into the other. You don't need to start with Chapter 1 and read it cover to cover. Just start with any chapter that looks interesting and jump around as you see fit. In this book you'll find chapters on advanced collision detection artificial intelligence and steering behaviors isometric projection using the camera and microphone for input 3D and much much more. *Advanced ActionScript 3.0 Animation* is also more

experimental in nature The techniques shown here might not be the best way to do things but they should work well and get you started in your own efforts to achieve a perfect implementation In fact many of the chapters can be seen as introductions to very complex topics that could fill a whole book by themselves Many of these subjects have been extensively covered elsewhere but not necessarily targeted for Flash or ActionScript 3.0 So it took a fair amount of work to pull the data together and get it all working and explain it all clearly in ActionScript This book will inspire you to find out about subjects that you might not have considered before acting as a springboard into your own research into the possibilities of ActionScript 3.0
