Embedded Autonomy Peter B. Evans, 2012-01-12 In recent years debate on the state's economic role has too often devolved into diatribes against intervention Peter Evans questions such simplistic views offering a new vision of why state involvement works in some cases and produces disasters in others To illustrate he looks at how state agencies local entrepreneurs and transnational corporations shaped the emergence of computer industries in Brazil India and Korea during the seventies and eighties Evans starts with the idea that states vary in the way they are organized and tied to society In some nations like Zaire the state is predatory ruthlessly extracting and providing nothing of value in return In others like Korea it is developmental promoting industrial transformation In still others like Brazil and India it is in between sometimes helping sometimes hindering Evans's years of comparative research on the successes and failures of state involvement in the process of industrialization have here been crafted into a persuasive and entertaining work which demonstrates that successful state action requires an understanding of its own limits a realistic relationship to the global economy and the combination of coherent internal organization and close links to society that Evans called embedded autonomy

Embedded Autonomy Peter B. Evans, 1995-01-01 **Democratising Local Government**, 2002 Local government is at the forefront of development In South Africa the ambitious policy objectives of post apartheid reconstruction and development hinge on the successful creation of a democratic tier of government close to the people An entirely new system of developmental local government has thus been introduced As is the case in many developing countries the responsibilities of municipalities in South Africa have been extended dramatically often without adequate resources Managing municipalities for development therefore requires political will and strategic intervention The book provides a comprehensive introduction to developmental local government It includes the design of the new local government system and the issues posed by decentralisation an overview of specific challenges of urban and rural municipalities a discussion of special issues facing local government including poverty gender and environment new tools for local government including budgeting indicators municipal partnerships and capacity building *The Myth of the Powerless State* Linda Weiss, 1998 This volume's central proposition is that the impact of external economic pressures is to a large degree domestically determined varying in important measure according to the robustness or weakness of national institutions [The Struggle for Development and Democracy: A General Theory](#) Alessandro Olsaretti, 2023-03-13 In *The Struggle for Development and Democracy* Alessandro Olsaretti argues that we need significantly new theories of development and democracy to answer the problem posed by neoliberalism and the populist backlash namely uneven development and divisive politics heightened by the 9/11 attacks This volume proposes a general theory of development and democracy as part of a unified theory of power emphasizing that development needs markets civil society and the state and also the proper networks and interactions amongst markets civil society and the state Imperialism undermines these interactions and turns countries into providers of cheap land or labour

This book begins to sketch the mechanisms at work and to answer one question how did imperialist elites build their power All royalties from sales of this volume will go to GiveWell org in honour of Alessandro Olsaretti s memory **Hong Kong's Governance Under Chinese Sovereignty** Brian C. H. Fong,2014-09-04 As a hybrid regime Hong Kong has been governed by a state business alliance since the colonial era However since the handover in 1997 the transformation of Hong Kong s political and socio economic environment has eroded the conditions that supported a viable state business alliance This state business alliance which was once a solution for Hong Kong s governance has now become a political burden rather than a political asset to the post colonial Hong Kong state This book presents a critical re examination of the post 1997 governance crisis in Hong Kong under the Tung Chee hwa and Donald Tsang administrations It shows that the state business alliance has failed to function as an organizational machinery for supporting the post colonial state and has also served to generate new governance problems Drawing upon contemporary theories on hybrid regimes and state capacity this book looks beyond the existing opposition centered explanations of Hong Kong s governance crisis By establishing the causal relationship between the failure of the state business alliance and the governance crisis facing the post colonial state Brian C H Fong broadens our understanding of the governance problems and political confrontations in post colonial Hong Kong In turn he posits that although the state business alliance worked effectively for the colonial state in the past it is now a major problem for the post colonial state and suggests that Hong Kong needs a realignment of a new governing coalition Hong Kong s Governance under Chinese Sovereignty will enrich and broaden the existing literature on Hong Kong s public governance whilst casting new light on the territory s political developments As such it will be welcomed by students and scholars interested in Chinese politics Hong Kong politics and governance [Managing FDI for Development in Resource-Rich States](#) L. The EPRD's Quest for a Developmental Coalition](#) Oliver Reimer,2021-01-05 Master s Thesis from the year 2020 in the subject Politics Region Africa grade 1 2 University of Frankfurt Main Institut f r Politikwissenschaft language English abstract This thesis is conducting an in depth analysis of the links between political power institutional evolution and economic growth in Ethiopia since the fall of the Derg regime in 1991 A contemporary critique of the global political economy must not be caught in a liberal perspective on the origins of economic development Liberal theorists amongst others have perceived rapid economic development to be contingent on the support by the legal institutional structure which characterises capitalist societies in the Global North The central pillars of this structure are legally protected private property rights the rule of law and a state monopoly on violence Liberal strands of development theory have attributed the failure of many societies in the Global South to catch up with Northern levels of welfare to the absence or insufficiency of

these institutions In the most recent decades this perspective has been promulgated most prominently by the New Institutional Economics NIE Its analysis which found its way into policy under the catchword of good governance claims that the takeoff of capitalism in the Global South is impeded by high levels of corruption legal insecurity and the capture of state institutions by vested interests Scholars who stand in the tradition of Marxism and Keynesianism have been disputing this causality for its supposed disregard of the socio historical conditions which evoked the entrenchment of capitalist interests in societies of the Global North Marx had highlighted that the transition to capitalism and indeed all forms of economic growth redistribute economic surplus unequally between different social forces He therefore claimed that the entrenchment of capitalist modes of production was an outcome of social power struggles in which the dominant group enforced its interests on less powerful groups Institutions functioned to consolidate materialise and perpetuate this relation of power Abandoning the teleology of Marx some post Marxist scholars have adapted this perspective on institutions they claim that institutions are an outcome of power struggles and thus reflect historical distributions of power rather than to be a means to transform the distribution of power in itself
