Foundations Of Artificial Intelligence A Sourcebook:

The Foundations of Artificial Intelligence Derek Partridge, Yorick Wilks, 1990-04-26 This outstanding collection is designed to address the fundamental issues and principles underlying the task of Artificial Intelligence *The Foundations of Artificial Intelligence: a Source Book* Derek Partridge, Wilks Yorick, 1990 **Theoretical Foundations of Artificial**

General Intelligence Pei Wang, Ben Goertzel, 2012-08-31 This book is a collection of writings by active researchers in the field of Artificial General Intelligence on topics of central importance in the field Each chapter focuses on one theoretical problem proposes a novel solution and is written in sufficiently non technical language to be understandable by advanced undergraduates or scientists in allied fields This book is the very first collection in the field of Artificial General Intelligence AGI focusing on theoretical conceptual and philosophical issues in the creation of thinking machines All the authors are researchers actively developing AGI projects thus distinguishing the book from much of the theoretical cognitive science and AI literature which is generally quite divorced from practical AGI system building issues And the discussions are presented in a way that makes the problems and proposed solutions understandable to a wide readership of non specialists providing a distinction from the journal and conference proceedings literature The book will benefit AGI researchers and students by giving them a solid orientation in the conceptual foundations of the field which is not currently available anywhere and it would benefit researchers in allied fields by giving them a high level view of the current state of thinking in the AGI field Furthermore by addressing key topics in the field in a coherent way the collection as a whole may play an important role in guiding future research in both theoretical and practical AGI and in linking AGI research with work in allied disciplines

Artificial Intelligence and Machine Learning Shoaib Irfan Mohammed , 2025-10-29 Artificial Intelligence AI and Machine Learning ML are rapidly advancing fields that focus on creating systems capable of performing tasks that normally require human intelligence These tasks include learning from experience recognizing patterns making decisions solving problems and adapting to new situations Artificial Intelligence is the broader concept that aims to build intelligent machines Machine Learning is a subset of AI that enables systems to automatically learn and improve from data without being explicitly programmed *AI and Cognitive Science '90* Michael F. McTear, Norman Creaney, 2013-03-14 This book contains the edited versions of papers presented at the 3rd Irish Conference on Artificial Intelligence and Cognitive Science which was held at the University of Ulster at Jordanstown Northern Ireland on 20 21 September 1990 The main aims of this annual conference are to promote AI research in Ireland to provide a forum for the exchange of ideas amongst the different disciplines concerned with the study of cognition and to provide an opportunity for industry to see what research is being carried out in Ireland and how they might benefit from the results of this research Although most of the participants at the conference came from universities and companies within Ireland a positive feature of the conference was the extent of interest shown outside of Ireland resulting in participants from USA Canada Austria and England The keynote speakers were Professor
