It maintains that there is no conflict between Christian doctrine and economic science properly understood. Therefore, *Foundations of Economics* has three goals: to demonstrate that the foundations of economic laws are derived from a Christian understanding of nature and humanity; to explain basic economic principles of the market economy and apply them to various economic problems such as poverty and economic development; and to show the relationship between Christian ethics and economic policy. *Foundations of Economics: A Christian View* accomplishes these goals by rooting the fundamental principles of human action in the Christian doctrines of creation and humanity and integrating them with the Christian ethic of private property. This volume explains the relevance of economics for fulfilling the cultural mandate set forth in the first two chapters of Genesis by demonstrating how economics can help us in our task to be fruitful and multiply and have dominion over the earth without spoiling creation, starving to death, or descending into a barbaric struggle for survival. [Efficiency Instead of Justice?](#) Klaus Mathis, 2009-03-18. Economic analysis of law is an interesting and challenging attempt to employ the concepts and reasoning methods of modern economic theory so as to gain a deeper understanding of legal problems. According to Richard A. Posner, it is the role of the law to encourage market competition and where the market fails because transaction costs are too high to simulate the result of competitive markets. This would maximize economic efficiency and social wealth. In this work, the lawyer and economist Klaus Mathis critically appraises Posner's normative justification of the efficiency paradigm from the perspective of the philosophy of law. Posner acknowledges the influences of Adam Smith and Jeremy Bentham, whom he views as the founders of normative economics. He subscribes to Smith's faith in the market as an ideal allocation model and to Bentham's ethical consequentialism. Finally, aligning himself with John Rawls's contract theory, he seeks to legitimize his concept of wealth maximization with a consensus theory approach. In his interdisciplinary study, the author points out the possibilities as well as the limits of economic analysis of law. It provides a method of analysing the law which, while very helpful, is also rather specific. The

efficiency arguments therefore need to be incorporated into a process for resolving value conflicts In a democracy this must take place within the political decision making process In this clearly written work Klaus Mathis succeeds in making even non economists more aware of the economic aspects of the law **Principia Oeconomica** Anghel N.
