Electrical Engineering Laboratory Experiments C. W. Ricker, 2015-06-25 Excerpt from *Electrical Engineering Laboratory Experiments* If the student taking an electrical engineering laboratory course is required to rely on his own resources exert his own initiative and do some original thinking that course will stand out in his memory as one of the few in which he really accomplished the end in view namely a natural growth of reasoning power the power of keen and accurate observation the ability to analyze and draw conclusions and a knowledge of the fundamentals involved in the construction and operation of electrical machinery To make laboratory teaching effective the student should be carefully supervised at the beginning of his course in order that he may learn as rapidly as possible the fundamentals of electrical testing and use them as his tools for the more advanced work He should then be assigned work which will require original thinking and be required to rely more or less upon his own resources He should be encouraged to hunt up some problem in which he is particularly interested and tackle it as a real research proposition In this way he will unconsciously exercise his initiative and prefer to rely upon his own resources During the preparation of this book the writers have had the above philosophy constantly in mind and believe the book to be sufficiently flexible for adaptation to almost any Electrical Engineering Laboratory Course This book is the result of an extended period of growth and experience The original notes were written by Professor R R Lawrence and published in neostyle form in 1903 for use in the Lowell Institute for Industrial Foremen These notes were later revised and enlarged by Professor Lawrence in 1907 and again revised and enlarged by him and published in book form in 1914 Professors Lawrence and C W Green in 1914 took a portion of the material revised it and published it for use in connection with the courses in Electrical Engineering Laboratory at the Massachusetts Institute of Technology About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *Electrical Engineering Laboratory Experiments* Claire William Ricker, Carlton Everett Tucker, 1940 **Electrical Engineering Laboratory Experiments for Non-electrical Students ...** University of Virginia.
