Ellipsis In Comparatives:

Ellipsis in Comparatives Winfried Lechner, 2004 Biographical note Winfried Lechner is researcher at the Department of Linguistics University of Tuebingen Germany The Syntax of Comparative Constructions Julia Bacsikai-Atkari, 2014 Adopting a minimalist framework the dissertation provides an analysis for the syntactic structure of comparatives with special attention paid to the derivation of the subclause The proposed account explains how the comparative subclause is connected to the matrix clause how the subclause is formed in the syntax and what additional processes contribute to its final structure In addition it casts light upon these problems in cross linguistic terms and provides a model that allows for synchronic and diachronic differences This also enables one to give a more adequate explanation for the phenomena found in English comparatives since the properties of English structures can then be linked to general settings of the language and hence need no longer be considered as idiosyncratic features of the grammar of English First the dissertation provides a unified analysis of degree expressions relating the structure of comparatives to that of other degrees It is shown that gradable adjectives are located within a degree phrase DegP which in turn projects a quantifier phrase QP and that these two functional layers are always present irrespectively of whether there is a phonologically visible element in these layers Second the dissertation presents a novel analysis of Comparative Deletion by reducing it to an overttness constraint holding on operators in this way it is reduced to morphological differences and cross linguistic variation is not conditioned by way of postulating an arbitrary parameter Cross linguistic differences are ultimately dependent on whether a language has overt operators equipped with the relevant compr and rel features Third the dissertation provides an adequate explanation for the phenomenon of Attributive Comparative Deletion as attested in English by way of relating it to the regular mechanism of Comparative Deletion I assume that Attributive Comparative Deletion is not a universal phenomenon and its presence in English can be conditioned by independent more general rules while the absence of such restrictions leads to its absence in other languages Fourth the dissertation accounts for certain phenomena related to diachronic changes examining how the changes in the status of comparative operators led to changes in whether Comparative Deletion is attested in a given language I argue that only operators without a lexical XP can be grammaticalised The underlying mechanisms underlying are essentially general economy principles and hence the processes are not language specific or exceptional Fifth the dissertation accounts for optional ellipsis processes that play a crucial role in the derivation of typical comparative subclauses These processes are not directly related to the structure of degree expressions and hence the elimination of the quantified expression from the subclause nevertheless they are shown to be in interaction with the mechanisms underlying Comparative Deletion or the absence thereof A Grammar of the English Comparative Karen Lynn Ryan, 1986

Generative Perspectives on Degrees Anastasiia Vyshnevskaya, Edoardo Cavirani, 2025-10-20 The volume collects papers by leading semanticists syntacticians and morphologists working on the notion of degree It aims at deepening our

understanding of i the internal and external syntax of the standard clause ii the internal morphological structure of the comparative marker e g er in English iii different semantic implementations of the notion of degree iv the syntactic status and semantic contribution of standard markers and v the distinction between phrasal and clausal comparatives and their interaction with the process of comparative deletion The authors are raising a number of fundamental questions related to the nature of degrees and the way they are encoded in syntax and semantics Among them are What are degrees introduced by Are they primitives or sets What is the internal structure of comparative adjectives Is there a containment relation between the positive and the comparative forms Is the comparative always morphologically overt We believe that the answers to these questions provided by the selected authors will be a crucial component for a deeper understanding of degree and its formal modeling within the generative framework As such this volume represents a fundamental tool for intermediate and advanced researchers working on comparative and equative constructions comparative and superlative adjectives and adverbs standard markers diminutives and deadjectival verbs

Projecting the Adjective Christopher Kennedy, 2013-02-01 First Published in 1999 The main argument presented in this volume is that gradable adjectives like bright dense and short denote measure functions functions from objects to abstract representations of measurement or scales and degrees This proposal is shown to provide a foundation for principled explanations of a wide range of syntactic and semantic properties of gradable adjectives and the constructions in which they appear ranging from the syntactic distribution of gradable adjectives to the scopal characteristics of comparatives and the empirical effects of adjectival polarity
