Fire On High:

Fire on the Mountain: Addressing Idolatry Riaan Engelbrecht,2023-08-21 There is a fire on the mountain It is a wildfire of apostasy tearing through the church fuelled by idolatry It is because of the winds of false doctrine that this wildfire keeps spreading and it has been causing massive damage for hundreds of years to the church Yet the fire is not being checked addressed or effectively extinguished by believers The fire of apostasy has been receiving plenty of fuel for the last 1800 or so years to be a raging inferno Yes there is a profane fire burning on the altars build on the spiritual high places An increasing level of idolatry and spiritual apostasy plagues the world and the church The fire of idolatry has swept through churches for a long time consuming and destroying It is the profane fire An unholy fire Who shall contain the fire It is time for the church to earnestly address idolatry in her midst for idolatry is an abomination in the eyes of God God alone shall be worshipped He should be our highest devotion and our heart s desire above all Idolatry is not a trivial matter as Israel discovered God is calling for concerted and real action from the church to address idolatry for our God is a jealous God and He is an all consuming fire He must be our First Love nothing else and certainly no one else including the self Fire on Earth Andrew C. Scott,David M. J. S. Bowman,William J. Bond,Stephen J. Pyne,Martin E. Alexander,2013-10-31 Earth is the only planet known to have fire The reason is both simple and profound fire exists because Earth is the only planet to possess life as we know it Fire is an expression of life on Earth and an index of life s history Few processes are as integral unique or ancient Fire on Earth puts fire in its rightful place as an integral part of the study of geology biology human history physics and global chemistry Fire is ubiquitous in various forms throughout Earth and belongs as part of formal inquiries about our world In recent years fire literature has multiplied exponentially dedicated journals exist and half a dozen international conferences are held annually A host of formal sciences or programs announcing interdisciplinary intentions are willing to consider fire Wildfire also appears routinely in media reporting This full colour text containing over 250 illustrations of fire in all contexts is designed to provide a synthesis of contemporary thinking bringing together the most powerful concepts and disciplinary voices to examine in an international setting why planetary fire exists how it works and why it looks the way it does today Students lecturers researchers and professionals interested in the physical ecological and historical characteristics of fire will find this book and accompanying web based material essential reading for undergraduate and postgraduate courses in all related disciplines for general interest and for providing an interdisciplinary foundation for further study A comprehensive approach to the history behaviour and ecological effects of fire on earth Timely introduction to this important subject with relevance for global climate change biodiversity loss and the evolution of human culture Provides a foundation for the interdisciplinary field of Fire Research Authored by an international team of leading experts in the field Associated website provides additional resources **Fire Officer: Principles and Practice** Michael J. Fire Design of Concrete Structures - Structural Behaviour and Assessment fib Fédération internationale du béton,2008-01-01 Concrete is well known to behave efficiently in fire conditions as it is incombustible does not emit smoke and provides good thermal insulation Furthermore in reinforced concrete structures the concrete cover gives a natural protection to the reinforcement and the size of the sections often delays the heating of the core thus favouring the fire resistance of the structural members In addition concrete structures are often robust and therefore able to accommodate local damage without major consequences to the overall structural integrity However past experience with real fires shows that a thorough understanding of concrete behaviour and structural mechanics is still needed to improve the design of R C structures with respect to fire The objective of fib Bulletin 46 is to augment the current knowledge about concrete and concrete structures under fire not only for the design of new structures but also for the analysis and repair of existing fire damaged structures Both structural and materials issues are examined and the results of the most recent research activities on the structural performance of concrete subjected to fire are reported Special attention is paid to the indirect actions caused by the restrained thermal deformations and several basic examples show how a local fire influences global structural behaviour fib Bulletin 46 is intended for use by practicing engineers to improve their understanding of the behaviour of concrete structures in fire and thereby produce better and safer design standards
