Fiber Optics Standard Dictionary:

Fiber Optics Standard Dictionary Martin H. Weik, 2013-04-17 The first edition of this dictionary was written during the years preceding 1980. No fiber optics glossary had been published by any recognized standards body. No other dictionaries in fiber optics had been published. A significant list of fiber optics terms and definitions, NBS Handbook 140 Optical Waveguide Communications Glossary, was issued in 1982 by the National Bureau of Standards, now the National Institute of Standards and Technology. Since then, several publications by standards bodies contained fiber optics terms and definitions. In 1984, the Institute of Electrical and Electronic Engineers published IEEE Standard 812-1984 Definitions of Terms Relating to Fiber Optics. In 1986, the National Communications System published Federal Standard FED-STD 1037A Glossary of Telecommunications Terms, containing about 100 fiber optics terms and definitions. In 1988, the Electronics Industries Association issued EIA-440A Fiber Optic Terminology. All of these works were based on NBS Handbook 140, compiled 10 years earlier. Currently, the International Electrotechnical Commission is preparing IEC Draft 731 Optical Communications Terms and Definitions. Work in fiber optics terminology is being contemplated in the International Organization for Standardization and the International Telecommunications Union. None of these works constitutes a comprehensive coverage of the field of fiber optics. Each was prepared by professional people representing specific interest groups. Each work was aimed at specific audiences: research activities, development activities, manufacturers, scientists, engineers, and so on. Their content is devoted primarily to fundamental scientific and technical principles and theory rather than state-of-the-art and advanced technology.

Fiber Optics Standard Dictionary Martin Weik, 2012-12-06 Fiber Optics Vocabulary Development. In 1979, the National Communications System published Technical Information Bulletin TB 79-1 Vocabulary for Fiber Optics and Lightwave Communications, written by this author. Based on a draft prepared by this author, the National Communications System published Federal Standard FED-STD 1037 Glossary of Telecommunications Terms in 1980, with no fiber optics terms. In 1981, the first edition of this dictionary was published under the title Fiber Optics and Lightwave Communications Standard Dictionary. In 1982, the then National Bureau of Standards, now the National Institute of Standards and Technology, published NBS Handbook 140 Optical Waveguide Communications Glossary, which was also published by the General Services Administration as PB82-166257 under the same title. Also in 1982, Dynamic Systems Inc. Fiber Optic Sensor Technology Handbook, co-authored and edited by this author, with an extensive Fiber Optic Sensors Glossary. In 1989, the handbook was republished by Optical Technologies Inc. It contained the same glossary. In 1984, the Institute of Electrical and Electronic Engineers published IEEE Standard 812-1984 Definitions of Terms Relating to Fiber Optics. In 1986, with the assistance of this author, the National Communications System published FED-STD 1037A Glossary of Telecommunications Terms, with a few fiber optics terms. In 1988, the Electronics Industries Association issued EIA-440A Fiber Optic Terminology, based primarily on PB82-166257. The International Electrotechnical Commission then published IEC 731 Optical Communications
