Design, History and Time Zoë Hendon, Anne Massey, 2019-02-21 *Design History and Time* reflects on the nature of time in relation to design in both past and contemporary contexts In contrast to a traditional design historical approach which emphasises schools and movements this volume addresses time as a continuum and considers the importance of temporality for design practice and history Contributors address how designers design historians and design thinkers might respond to the global challenges of time the rhythms of work and the increasing speed of life and communication between different communities They consider how the past informs the present and the future in terms of design the importance of time based design practices such as rapid prototyping and slow design time in relation to memory and forgetting and artefacts such as the archive for which time is key and ponder the design of time itself Showcasing the work of fifteen design scholars from a range of international contexts the book provides an essential text for thinking about changing attitudes to the temporal

**The Future Revisited** Françoise Schiltz, 2012-05-04 *The Future Revisited* examines Hollywood adaptations of Jules Verne stories and is an interdisciplinary study that offers a fresh perspective on film history French literature science fiction and America in the 1950s It is a fascinating and authoritative account of how the stories of Jules Verne a distinguished French novelist better known around the world as the father of science fiction and an accurate predictor of much of the twentieth century found particular resonance with US filmmakers in the 1950s Schiltz looks at four of the most popular films *Around the World in 80 Days* *20 000 Leagues Under the Sea* *Journey to the Center of the Earth* and *Mysterious Island* and argues that there were many parallels between Verne's technological adventures and postwar America with its theme parks shopping malls Levittowns and plethora of consumer goods Just as nineteenth century readers of Verne's books could experience travel from the comfort of their seats viewers of these films could be swept away on an imaginary flight a voyage in a submarine or a trek to the earth's core all in spectacular widescreen and with ground breaking special effects Yet the pleasures offered were ambivalent encounters with exotic places and cultures might have led the audience to question common assumptions such as gender roles seeing futuristic domestic spaces could highlight the confusion of attitudes to private and public life in suburbia and the films blending of nostalgia and progress might draw attention to society's tug of war between innovation and conformity
