**Folding in Architecture** Greg Lynn,2004-06-07 This seminal book from Architectural Design was originally published in 1993 at a time of crucial change and on the eve of the digital revolution It brought together a series of essays that many believe created the favourable environment in which computer based design could thrive Considered one of the most influential architecture publications of the 1990s this book ranks as a classic and in itself is a crucial chapter of history though one that has been out of print since 1999 This faithful reprinting includes a substantial new introductory essay by Mario Carpo Head of the Study Centre at the Canadian Centre for Architecture which examines the impact of the original texts and their ongoing significance Thereafter the book is true to its original content showcasing projects by ground breaking architects such as Greg Lynn Jeffrey Kipnis Bahram Shirdel Frank Gehry and Philip Johnson

**Folding Architecture** Sophia Vyzoviti,2003 A relatively new trend in architecture folding is a playful method that opens up the design process to spontaneity and surprise Folding Architecture presents the results of research into the technique which was carried out in The Netherlands by the architectural faculty at the TU in Delft It is an enlightening and inspiring survey that is vividly illustrated and presents all of the much discussed concepts projects and buildings in which this process has been applied And as the book implies the possibilities are endless Compulsory reference material for any architect or student of architecture who wishes to design outside of mainstream

**Contemporary Architecture** Marta Tobolczyk,2021-07-05 This book offers an exciting journey into the most recent architectural achievements seen in their complexity and plurality and described in the most objective and truthful way The development of contemporary architecture is presented as it commenced more than a century ago as it tried to reconcile democratic ideals with the forces of the Industrial Era In contrast to many books on the modern day art of building the development of architecture is not described chronologically here but rather independently for each selective architectural trend This allows a better explanation of some evolutionary processes and the continuity of each trend Thanks to such an approach this book will serve as a convenient tutorial for courses on history of contemporary architecture in all art and architectural schools
