Focus On Value:

Focus and Background Marking in Mandarin Chinese Daniel Hole,2004-08-02 This is an investigation into the grammaticalized system of focus background agreement in Mandarin Chinese The particles *c i ji dou* and *ye* are in a specific use type shown to form the core of a highly systematic paradigm This book is not just a valuable companion for anyone interested in core aspects of Mandarin Chinese grammar It caters for the interests of theoretical linguists as well as for linguists from other fields with an interest in information structure focus and contrastive topics and quantification The outstanding characteristic of this book viz its effortless integration of findings from formal semantics without heavy formal load makes it rewarding reading both for linguists with a less formal background and for researchers with some knowledge of formal semantics

Compositional Semantics Pauline Jacobson,2014-08-29 This book provides an introduction to compositional semantics and to the syntax semantics interface It is rooted within the tradition of model theoretic semantics and develops an explicit fragment of both the syntax and semantics of a rich portion of English Professor Jacobson adopts a Direct Compositionality approach whereby the syntax builds the expressions while the semantics simultaneously assigns each a model theoretic interpretation Alongside this approach the author also presents a competing view that makes use of an

intermediate level Logical Form She develops parallel treatments of a variety of phenomena from both points of view with detailed comparisons The book begins with simple and fundamental concepts and gradually builds a more complex fragment including analyses of more advanced topics such as focus negative polarity and a variety of topics centering on pronouns and binding more generally Exercises are provided throughout alongside open ended questions for students to consider The exercises are interspersed with the text to promote self discovery of the fundamentals and their applications The book provides a rigorous foundation in formal analysis and model theoretic semantics and is suitable for advanced undergraduate and graduate students in linguistics philosophy of language and related fields

COVID-19 and Existential Positive Psychology (PP2.0): The New Science of Self-Transcendence Paul T. P. Wong, Claude-Hélène Mayer, Gökmen Arslan, In the era of COVID 19 many people have suffered high levels of stress and mental health problems To cope with the widespread of suffering physical psychological social and economical the positive psychology of personal happiness is no longer the sole approach to examine personal wellbeing Other approaches such as Viktor Frankl s theory of self transcendence provide a promising framework for research and intervention on how to achieve resilience wellbeing and happiness through overcoming suffering and self transcendence The existential positive psychology of suffering complements the positive psychology of happiness which is championed by Martin Seligman as two equal halves of the circle of wellbeing and optimal mental health This Research Topic aims to examine the different approaches to Positive Psychology and their influence on individual wellbeing during the COVID 19 era One of the exciting development in the positive psychology of wellbeing is the mounting research on the adaptive benefits of negative emotions such as shame guilt and anger as well as the dialectical process of balancing negative and positive emotions As an example based on all the empirical research and Frankl s self transcendence model Wong has developed the existential positive psychology of suffering PP2 0 as the foundation for flourishing Here are a few main tenets of PP2 0 1 Life is suffering and a constant struggle throughout every stage of development 2 The search for self transcendence is a primary motive guided by the meaning mindset and mindful mindset 3 Wellbeing cannot be sustainable without overcoming and transforming suffering In this Research Topic we welcome diverse approaches discussing the following points The dialectic process of overcoming the challenges of every stage of development as necessary for personal growth and self transcendence The role of self transcendence in resilience

virtue meaning and happiness The upside of negative emotions The new science of resilience based on cultivating the resilient mindset and character How to make the best use of suffering to achieve our potentials mental health
