Prophetic Wisdom Charles R. Strain, 2024-06-01 Classical Buddhism lacked an understanding of systemic injustice and its contribution to collective suffering Despite the teaching of impermanence classical Buddhist schools viewed social institutions as given and offered no path to social transformation Today Buddhists are shaped by multiple religious and secular traditions including those stemming from the Hebrew prophets The prophetic tradition offers a socially and religiously powerful concept the concept of justice that reconfigures the Buddhist dharma In a time of unparalleled peril Buddhists are challenged as never before to turn wisdom into strategic action to foster systemic social change Compassion is not enough Prophetic Wisdom shows how Engaged Buddhists can expand their understanding of the causes of collective suffering and develop nonviolent means for social transformation through a dialectic of love power and justice It concludes by confronting the poison of racism in the American body politic **Fathers of International Thought** Kenneth W.

Thompson, 1994-03-01 In *Fathers of International Thought* renowned foreign affairs scholar Kenneth W. Thompson returns to the writings of sixteen thinkers in order better to understand the issues and problems that recurrently beset global politics A companion volume to *Masters of International Thought* in which Thompson analyzed the thinking of eighteen leading twentieth century political theorists *Fathers of International Thought* traces the ideas of earlier philosophers theologians and legal and political theorists who provided the foundations for the present century's master thinkers Thompson begins by discussing the relevance of classical political philosophy to the field of modern international relations theory He then presents lucid essays on sixteen of the most brilliant minds from Plato through the nineteenth century focusing on the importance of their thought in contemporary international affairs Besides Plato the classical thinkers whom Thompson refers to as the fathers include Aristotle Augustine Thomas Aquinas Niccol Machiavelli Grotius David Hume Jean Jacques Rousseau Montesquieu Edmund Burke Immanuel Kant Georg Wilhelm Friedrich Hegel and Karl Marx According to Thompson the interrelatedness of earlier and recent thought is undeniable for such concepts as authority justice community regimes and power He shows how the ideas of the fathers have application to the current international scene as with events in Eastern Europe and the Persian Gulf area and political upheaval on the African continent The lesson for policy makers students of politics and international relations and indeed all citizens is that a comprehensive philosophical approach to world politics

can lead to the rediscovery of enduring political principles and our place in history By considering the insights of earlier thinkers decision makers may come to recognize most present day problems as perennial issues however changing the context Understanding the classics may help them avoid unsuccessful patterns in foreign policy An introductory survey of early political philosophers and their relevance to our times is sorely needed by students and practitioners of international politics *Fathers of International Thought* by a man Foreign Affairs described as one of the best teachers still active from the postwar generation of scholars that developed the discipline of international relations will be of lasting value in meeting that need *The Portable Karl Marx* Karl Marx, 1983-03-31 Includes the complete Communist Manifesto and substantial extracts from *On the Jewish Question* *the German Ideology* *Grundrisse* and *Capital* a broad representation of his letters and lesser known works especially his long unavailable early works
