Transformative Arts Gary A. Berg, 2024-03-02 Traditional fine arts are often regarded as rarefied something accessed by the uniquely talented and displayed in impressive museums or on lavish stages Art thusly conceived is something that most people never practice in their lives Yet in day to day life we all experience creative satisfaction through interaction with the physical and social environment that is a form of artistic practice In *Transformative Arts Biological Digital and Everyday Aesthetics* Gary A Berg explores what we gain through understanding ways to live imaginative lives and considers the increasingly important collaborative role of computers and interaction with nature **Iconography of Old Kingdom Elite Tombs** René van Walsem, 2005 What is presented here is a preliminary crystallization of thinking about questions problems and aspects that presented themselves during research into the iconography of Old Kingdom elite tombs in the so called Leiden Mastaba Project LMP started in 1980 for teaching advanced students Since the Egyptian culture has been given shape mainly in connection with the residences of the kings the elite tombs of the Memphite area only were incorporated into the database The original paper database consists of individual files on each tomb giving a plan wall scheme a concise description of each sub theme and its accompanying texts if present For details on the set up the original questions the intention and some preliminary results on the partially collected material in 1985 see Van Walsem Mastaba project The core of this essay is a combination of and an elaboration of two former lectures by the author entitled Some un der exposed aspects in the study and interpretation of mastaba scenes and Religious iconography of Ancient Egypt methodological and theoretical problems **The Age of Insight** Eric Kandel, 2012-03-27 A brilliant book by Nobel Prize winner Eric R Kandel The Age of Insight takes us to Vienna 1900 where leaders in science medicine and art began a revolution that changed forever how we think about the human mind our conscious and unconscious thoughts and emotions and how mind and brain relate to art At the turn of the century Vienna was the cultural capital of Europe Artists and scientists met in glittering salons where they freely exchanged ideas that led to revolutionary breakthroughs in psychology brain science literature and art Kandel takes us into the world of Vienna to trace in rich and rewarding detail the ideas and advances made then and their

enduring influence today The Vienna School of Medicine led the way with its realization that truth lies hidden beneath the surface That principle infused Viennese culture and strongly influenced the other pioneers of Vienna 1900 Sigmund Freud shocked the world with his insights into how our everyday unconscious aggressive and erotic desires are repressed and disguised in symbols dreams and behavior Arthur Schnitzler revealed women s unconscious sexuality in his novels through his innovative use of the interior monologue Gustav Klimt Oscar Kokoschka and Egon Schiele created startlingly evocative and honest portraits that expressed unconscious lust desire anxiety and the fear of death Kandel tells the story of how these pioneers Freud Schnitzler Klimt Kokoschka and Schiele inspired by the Vienna School of Medicine in turn influenced the founders of the Vienna School of Art History to ask pivotal questions such as What does the viewer bring to a work of art How does the beholder respond to it These questions prompted new and ongoing discoveries in psychology and brain biology leading to revelations about how we see and perceive how we think and feel and how we respond to and create works of art Kandel one of the leading scientific thinkers of our time places these five innovators in the context of today s cutting edge science and gives us a new understanding of the modernist art of Klimt Kokoschka and Schiele as well as the school of thought of Freud and Schnitzler Reinvigorating the intellectual enquiry that began in Vienna 1900 *The Age of Insight* is a wonderfully written superbly researched and beautifully illustrated book that also provides a foundation for future work in neuroscience and the humanities It is an extraordinary book from an international leader in neuroscience and intellectual history

Art History as Cultural History Richard Woodfield,2001 This book focuses on Aby Warburg 1866 1929 one of the legendary figures of twentieth century cultural history and includes the first translation of one of his key essays the Gombrich lecture

Looking for Lines Paul Akker,2025-10-01 Studies of Old Masters are often implicitly based on modern notions which do not necessarily tally with ideas contemporary with their art According to one such tacit assumption a work of art gains its status from the quality of the abstract pictorial composition made up of lines and colours Whether discussing a medieval altarpiece or a fresco by Raphael it is customary to relate its artistic value to the abstract formal language into which the figures or narratives are translated and not to the power of the visual illusion which is conjured up by the work of art Referring to the ideas of art historians critics and philosophers including Hogarth Caylus Goethe Schnaase Burckhardt W Ifflin and Shearman this theoretically revolutionary study questions the historical validity of this view by tracking down its origins back to the eighteenth century and then following its evolution up to the present day Paying particular attention to the historiography of Mannerism it scrutinises the influence that this view has had on aesthetic judgments over the past three centuries A perfect companion for anyone engaged with aesthetics this book offers a valuable contribution to the discussion surrounding the principles and values in art history
