MARK SCHEME for the October/November 2013 series

0580/21

0580 MATHEMATICS

Paper 2 (Extended), maximum raw mark 70

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Macdonald Theory and Beyond Daniel Orr, Joshua Jeishing Wen, 2025-03-27 This volume contains the proceedings of the AMS Special Session on Macdonald Theory and Beyond Combinatorics Geometry and Integrable Systems held virtually on March 19 20 2022 The articles in this volume represent a number of recent developments in the theory of Macdonald polynomials while highlighting some of its many connections to other areas of mathematics An important common thread throughout the volume is the role of combinatorial formulas for Macdonald polynomials themselves as well as operations on them arising from rich additional structures The articles of Haglund Mandelshtam and Romero concern the type A Macdonald polynomials which remain a major focus of the subject due to the depth of their combinatorial theory and the power of their specific applications For arbitrary type Macdonald polynomials a new combinatorial formula with pseudo crystal structure is presented in the article of Lenart Naito Nomoto and Sagaki Finally the articles of Saied and Wen take up two important new directions in the subject the SSV polynomials arising from the study of special functions on metaplectic groups and the wreath Macdonald polynomials associated with certain symplectic resolutions Computational Sciences - Modelling, Computing and Soft Computing Ashish Awasthi, Sunil Jacob John, Satyananda Panda, 2021-07-27 This book constitutes revised and selected papers of the First International Conference on Computational Sciences Modelling Computing and Soft Computing held in Kozhikode Kerala India in September 2020 The 15 full papers and 6 short papers presented were thoroughly reviewed and selected from the 150 submissions They are organized in the topical sections on computing soft computing general computing modelling **Proceedings of Third International Conference on Advances in Computer Engineering and Communication Systems** A. Brahmananda Reddy, S. Nagini, Valentina E. Balas, K. continuous time option pricing models The reader then learns what it takes to understand and implement these option pricing models based on time series analysis in a self contained way The discussion covers modeling choices available to the quantitative analyst as well as the tools to decide upon a particular model based on the historical datasets of financial returns The reader is then guided into numerical deduction of option prices from these models and illustrations with real examples are used to reflect the accuracy of the approach using datasets of options on equity indices **Service-Learning Pedagogy**

Virginia M. Jagla, Andrew Furco, Jean R. Strait, 2015-02-05 This volume explores service learning pedagogy in teacher education deepening relationships and new paradigms It aims to generate knowledge and develop theories about service learning highlighting its transformational learning potential and contributing to the growing body of research in the field
