**Applications of Finite Fields** Alfred J. Menezes, Ian F. Blake, XuHong Gao, Ronald C. Mullin, Scott A. Vanstone, Tomik Yaghoobian, 2013-04-17 The theory of finite fields whose origins can be traced back to the works of Gauss and Galois has played a part in various branches in mathematics In recent years we have witnessed a resurgence of interest in finite fields and this is partly due to important applications in coding theory and cryptography The purpose of this book is to introduce the reader to some of these recent developments It should be of interest to a wide range of students researchers and practitioners in the disciplines of computer science engineering and mathematics We shall focus our attention on some specific recent developments in the theory and applications of finite fields While the topics selected are treated in some depth we have not attempted to be encyclopedic Among the topics studied are different methods of representing the elements of a finite field including normal bases and optimal normal bases algorithms for factoring polynomials over finite fields methods for constructing irreducible polynomials the discrete logarithm problem and its implications to cryptography the use of elliptic curves in constructing public key cryptosystems and the uses of algebraic geometry in constructing good error correcting codes To limit the size of the volume we have been forced to omit some important applications of finite fields Some of these missing applications are briefly mentioned in the Appendix along with some key references

*Advances in Cryptology - EUROCRYPT '93* Tor Helleseth, 2003-05-13 Eurocrypt is a series of open workshops on the theory and application of cryptographic techniques These meetings have taken place in Europe every year since 1982 and are sponsored by the International Association for Cryptologic Research Eurocrypt 93 was held in the village of Lofthus in Norway in May 1993 The call for papers resulted in 117 submissions with authors representing 27 different countries The 36 accepted papers were selected by the program committee after a blind refereeing process The papers are grouped into parts on authentication public key block ciphers secret sharing stream ciphers digital signatures protocols hash functions payment systems and cryptanalysis The volume includes 6 further rump session papers

*Advances in Cryptology - CRYPTO '92* Ernest F. Brickell, 2003-06-30 Crypto 92 took place on August 16-20 1992 It was the twelfth in the series of annual cryptology conferences held on the beautiful campus of the University of California Santa Barbara Once again it was sponsored by the International Association for Cryptologic Research in cooperation with the IEEE Computer Society Technical Committee on Security and Privacy The conference ran smoothly due to the diligent efforts of the general chair Spyros Magliveras of the University of Nebraska One of the measures of the success of this series of conferences is represented by the ever increasing number of papers submitted This year there were 135 submissions to the conference which represents a new record Following the practice of recent program committees the papers received anonymous review The

program committee accepted 38 papers for presentation In addition there were two invited presentations one by Miles Smid on the Digital Signature Standard and one by Mike Fellows on presenting the concepts of cryptology to elementary age students These proceedings contains these 40 papers plus 3 papers that were presented at the Rump Session I would like to thank all of the authors of the submitted papers and all of the speakers who presented papers I would like to express my sincere appreciation to the work of the program committee Ivan Damgard Aarhus University Denmark Odd Goldreich Technion Israel Burt Kaliski RSA Data Security USA Joe Kilian NEC USA *Eurocode '90* Gérard Cohen, Pascale Charpin, 1991 Papers treat algebraic codes combinatorial and geometric codes information security convolutional codes information theory modulation and applications of coding No index Annotation copyrighted by Book News Inc Portland OR
