**Development at Marshfield Senior High, Marshfield, Wisconsin** Raymond Kenneth Anderson, 1958 Cross-sectoral  
Policy Developments in Forestry Yves C. Dubé, Franz Schmithüsen, 2007-01-01 This book containing 31 chapters grouped into  
two parts provides rich and multi faceted documentation of current progress being made in creating the political economic  
and social conditions indispensable for sustainable and multi functional use of forest resources and notes the obstacles that  
needs to be removed to reach this goal The first part chapters 1 9 introduces general and global aspects that have to be  
considered in the context of cross sectoral policy coordination This include discussions on the impact of external shocks such  
as a sudden oil price increase on forest management the impact of energy or trade policies on global wood markets and the  
role of decentralization in integrating multiple demands on forests The second part of the book deals with regional national  
and local issues of cross sectoral policy linkages The chapters on Africa chapters 10 15 focus largely on the improvement of  
land management practices such as agroforestry land tenure and gender issues more integrative policies in promoting  
reforestation and afforestation multiple stakeholder planning processes and external policy impacts in protecting and  
managing Miombo forests In Asia chapters 16 20 important subjects appearing in several chapters are the need to develop  
environmental and economic accounts for forestry and to demonstrate more clearly the great importance of non timber forest  
product linkages road construction and population effects of forest conversion community forest management contributions  
to the local and national economy and cross sectoral policy links in the development of mountainous areas are other issues  
addressed In the Europe part chapters 21 24 both environmental problems as well as strong trends towards developing a  
competitive forest and wood processing sector determine public policy development to a considerable extent This can be  
seen from leading policy scenarios that have been identified from the changes in perceptions with regard to the forest sector  
and from the policy issues at national level that are presented A somewhat similar pattern of competing policy demands  
between resource use industrial expansion and strong environmental demands emerges from the contributions dealing with  
the Americas chapters 25 31 These chapters contain the experiences of the USA in cross sectoral impact analysis the lessons  
to be learned from the long and confliction history in managing the national forests as well as from the resource conflicts  
described between forestry uses oil and gas development and environmental protection in the boreal regions of Canada

Jones,Rebecca Jean McLain,James F. Weigand,2002 A quiet revolution is taking place in America s forests Once seen primarily as stands of timber our woodlands are now prized as a rich source of a wide range of commodities from wild mushrooms and maple sugar to hundreds of medicinal plants whose uses have only begun to be fully realized Now as timber harvesting becomes more mechanized and requires less labor the image of the lumberjack is being replaced by that of the forager This book provides the first comprehensive examination of nontimber forest products NTFPs in the United States illustrating their diverse importance describing the people who harvest them and outlining the steps that are being taken to ensure access to them As the first extensive national overview of NTFP policy and management specific to the United States it brings together research from numerous disciplines and analytical perspectives such as economics mycology history ecology law entomology forestry geography and anthropology in order to provide a cohesive picture of the current and potential role of NTFPs The contributors review the state of scientific knowledge of NTFPs by offering a survey of commercial and noncommercial products an overview of uses and users and discussions of sustainable management issues associated with ecology cultural traditions forest policy and commerce They examine some of the major social economic and biological benefits of NTFPs while also addressing the potential negative consequences of NTFP harvesting on forest ecosystems and on NTFP species populations Within this wealth of information are rich accounts of NTFP use drawn from all parts of the American landscape from the Pacific Northwest to the Caribbean From honey production to a review of nontimber forest economies still active in the United States such as the Ojibway harvest of plants recounted here the book takes in the whole breadth of recent NTFP issues including ecological concerns associated with the expansion of NTFP markets and NTFP tenure issues on federally managed lands No other volume offers such a comprehensive overview of NTFPs in North America By examining all aspects of these products it contributes to the development of more sophisticated policy and management frameworks for not only ensuring their ongoing use but also protecting the future of our forests
