Cyber Zen Gregory Price Grieve,2016-12-08 Cyber Zen ethnographically explores Buddhist practices in the online virtual world of Second Life Does typing at a keyboard and moving avatars around the screen however count as real Buddhism If authentic practices must mimic the actual world then Second Life Buddhism does not In fact a critical investigation reveals that online Buddhist practices have at best only a family resemblance to canonical Asian traditions and owe much of their methods to the late twentieth century field of cybernetics If however they are judged existentially by how they enable users to respond to the suffering generated by living in a highly mediated consumer society then Second Life Buddhism consists of authentic spiritual practices Cyber Zen explores how Second Life Buddhist enthusiasts form communities identities locations and practices that are both products of and authentic responses to contemporary Network Consumer Society Gregory Price Grieve illustrates that to some extent all religion has always been virtual and gives a glimpse of possible future alternative forms of religion

Blogosphere Michael Keren,2006-09-15 Examining the web logs or blogs of individuals from a variety of continents and cultures this book highlights the nature of blogosphere the virtual public arena of the early 21st century which alters the traditional world of media and politics It characterizes this new arena by the unique combination of a fresh voice of emancipation and a deep sense of melancholy and isolationism This journey through blogosphere highlights major forces operating in today s politics apathy toward political affairs resistance to globalization a quest for redemption through religious fundamentalism and terrorism Michael Keren compares bloggers to terrorists arguing that while the methods advocated by the two groups are obviously very different they both represent a similar trend one of diversion by respected but disenfranchised citizens from the norms of civil society to a fantasy world in which the excessive use of words_or bombs_would make everybody listen

Living on Cybermind Jonathan Paul Marshall,2007 Cybermind is an Internet mailing list originally founded in 1994 to discuss the issues and problems of living online It proved exceptionally fertile and is still

going strong thirteen years later This book is an ethnographic investigation which follows Cybermind members in their daily lives on the List and explores the ways they look at the world argue relate online life to offline life use gender and build community Perhaps the most comprehensive history of an Internet group ever published it includes detailed analyses using List members own words and commentary and develops a unique theory of the relationship between culture the problems of communication and the ongoing processes of categorisation Living on Cybermind illustrates how behaviour is affected by the organisation of communication and how people deal with the paradoxes involved in resolving ambiguity and truth in a situation in which presence is always on the verge of slipping away

TechKnowledgies Mary Valentis,2007 A collection of essays a technology play by William Kennedy art and installations that represent and at times resist the ways science and technology are interacting with the arts and the humanities to produce imaginaries and disciplinary transmigrations that gesture towards a university of tomorrow @ Home Rana Rita Abboud,2006 Religious Communities on the Internet Göran Larsson,2006 *Women's Voices, Feminist Visions* Susan Maxine Shaw,Janet Lee,2007 An introductory women s studies reader which offers various classic conceptual and experiential writings It contains chapter introductions which provide background information on topics including explanations of key concepts and ideas and references to the subsequent reading selections *Virtual Communities* Felicia Wu Song,2009 Does contemporary Internet technology strengthen civic engagement and democratic practice The recent surge in online community participation has become a cultural phenomenon enmeshed in ongoing debates about the health of American civil society But observations about online communities often concentrate on ascertaining the true nature of community and democracy typically rehearsing familiar communitarian and liberal perspectives This book seeks to understand the technology on its own terms focusing on how the technological and organizational configurations of online communities frame our contemporary beliefs and assumptions about community and the individual It analyzes key structural features of thirty award winning online community websites to show that while the values of individual autonomy egalitarianism and freedom of speech dominate the discursive content of these communities the practical realities of online life are clearly marked by exclusivity and the demands of commercialization and corporate surveillance Promises of social empowerment are framed within consumer and therapeutic frameworks that undermine their democratic efficacy As a result online communities fail to revolutionize the civic landscape because they create cultures of membership that epitomize the commodification of community and public life altogether **Virtual Trouble** Patricia Gonzalez Lange,2003

Interpersonal Culture on the Internet Sarah N. Gatson,Aminda Zweerink,2004 Community is a highly contested concept and in the milieu of mass media it is even more highly fraught The book is a community formation narrative adding to our common database of emergent community practice on the Internet The book bolsters our understandings of the

substantive processes involved particularly those of boundary formation spatial dimensions of communities and how communities are always both embedded and emerging entities Finally it deals with the question of how seamless and or disruptive the new technology of the Internet is vis a vis our traditional practices of community formation and maintenance We are interested in a problem with communities based in media fandoms Eventually the artist will quit making music the movie will cease to have sequels or the television show will get cancelled What happens to these communities when their basis of interest goes away Is the bond of community enough to keep them together Why do people fracture into other groups Why do some hold on to the one for all all for one mentality chosen offline or do they stick by the friends they made in the community who would not ordinarily be their type In the last couple of years of working with this community the ways in which one gauges when a community ends and when it merely morphs into some other kind of interpersonal phenomenon have been at the forefront of our research The book is ethnographic in method and deals with community concepts such as networks geography boundaries and politics The Contexts Reader Jeff Goodwin, James M. Jasper, 2008 The Contexts Reader collects over sixty of the best articles from the award winning magazine Contexts in one affordable anthology **The Role of Communication in Business Transactions and Relationships** Michael Bernhard Hinner, 2007 Without communication business is not possible It is therefore desirable and necessary that communication be integrated into all aspects of business if one wishes to truly comprehend and succeed in business transactions and relationships The contributing authors of this volume are all acknowledged experts in the field of communication Their texts demonstrate how communication influences directs and determines virtually each and every facet of the business world In turn a better more comprehensive understanding of business is possible
