The Farming Game Bryan Jones, 1995-03-01 In cantankerous opinions hard headed advice and free swinging sketches of real farmers Bryan Jones addresses everyone who feels the pull of the land He accepts the emotional appeal of going back to the land and then takes the unconventional stand that above all farming can be a good way to make money Against the grain of public policy that he maintains encourages big agriculture Jones works out how a shrewd stubborn small farmer can still make a go of it His keen eyed sketches of farmers at work show the variety of ways a farmer may succeed or fail Even his own neighborhood dominated by thousands of acres of corn and high technology is peopled with scalper who makes a living in the cattle business with little more stake than a gooseneck trailer a telephone and his native wits the sheep man who secretly grows rich while looking poor and raising an animal that other farmer disdain the experimenter who never turns a nickel himself but whose successful innovations are readily adopted by his neighbors the hog raiser who makes a large family pay The heart of the book is the primer for novices and for city folk who dream of farming Jones emphasizes the practicalities of farm finance and recommends sidelines for the beginner welding giving guitar lessons keeping the books for a local elevator as an alternative to starving He urges newcomers to start small and to be sure that farming is something they really want to do To interested bystanders The Farming Game offers one farmer s audacious stimulating and entertaining view of American agriculture today

Rod Gerber,2013-03-09 I am very pleased to have been asked by Rod Gerber to provide a preface to such a book Not least because of the twenty four chapters eight are written by former students or colleagues with whom I have worked in the past and whom I still meet at conferences on geographical education It is with a certain pride and joy that I note the progress which has been made in geographical education both in its day to day teaching and in research in the twenty years following the end of my term of office as Chair of the Commission on Geographical Education of the International Geographical Union CGEIUG My successors Joe Stoltman Hartwig Haubrich Rod Gerber and now Lea Houtsonen have done much and are continuing to work hard to foster the development of geographical education This book is proof if proof were needed that the international collaboration in this field is alive and well with contributions coming from all the continents except Antarctica It would be a moribund subject that remained unaffected in one way or another by developments on the great world stage as Fairgrieve 1926 would have put it And as Rod Gerber shows the issues of globalisation of cultural encounters of differing value systems of new technologies of variable economic development and of environmental quality all feature as topics which influence and are influenced by geographical education
