

Left: Emerson  
Type: 77048-AN  
Blades: 14"  
Date: 1940

A large fan has impressive overlapping blades with a double cross guard. The pairs of wires intersecting the cross are doubled on DC fans of this period. The fan is finished in a dark gray wrinkle finish. These fans were very efficient and quiet and could be purchased with a capacitor for further energy action.

Left: Emerson  
Type: 77045  
Blades: 10"  
Date: 1938

Emerson made direct current fans primarily for industrial and commercial use, and these are two later examples. Note that the newly designed overlapping blades and cross guard have been incorporated into the design. It seems that Emerson never put a bullet back on direct current fans, even though they were a standard feature after about 1940. Another thing that makes this fan unusual is the small size. Ten inch fans were primarily used for residential and not for commercial use.

Right: Emerson  
Type: 77048-AK  
Blades: 10"  
Date: 1940

This is a very late example of a direct current fan made for industrial use. It incorporates all the latest fan modifications for 1940 including large overlapping blades, cross guard, but no bullet back. The fan is finished in a high gloss black enamel. The base has a raised switch designed for a capacitor, but this would be of no use on a direct current fan. This fan is extremely efficient and blows a large amount of air.
