Economic Evaluation:

Essentials of Economic Evaluation in Healthcare Rachel Elliott, Katherine Payne, 2005 This book is an introduction to economic evaluation for those with little or no knowledge of economics or health economics *Essentials of Economic Evaluation in Healthcare* gives an overview of economic issues specific to healthcare and describes the main types of economic evaluation cost effectiveness cost utility and cost benefit analysis The use of decision analysis to design and carry out economic evaluations is discussed Preferred statistical methods for handling costs current approaches to dealing with uncertainty and quantifying patient preferences using discrete choice experiments are explained Each chapter contains worked examples and questions With increasing pressure on national healthcare budgets all healthcare professionals should have a basic understanding of the finite nature of healthcare resources and the need to make choices between treatments based on a cost benefit comparison This book will be invaluable to pharmacists and pharmacy students as well as to other healthcare professionals researchers and managers publisher website

Economic Evaluation in Education Henry M. Levin, Patrick J. McEwan, Clive Belfield, A. Brooks Bowden, Robert Shand, 2017-06-15 The past decade has seen increased attention to cost effectiveness and benefit cost analysis in education as administrators are being asked to accomplish more with the same or even fewer resources philanthropists are keen to calculate their return on investment in social programs and the general public is increasingly scrutinizing how resources are allocated to schools and colleges This text titled *Cost Effectiveness Analysis* in its previous editions is the only full length book to provide readers with the step by step methods they need to plan and implement a benefit cost analysis in education The authors examine a range of issues including how to identify measure and distribute costs how to measure effectiveness utility and benefits and how to incorporate cost evaluations into the decision making process The updates to the Third Edition reflect the considerable methodological development in the evaluation literature and the greater empiricism practiced by education researchers to help readers learn to apply more advanced methods to their own analyses SAGE congratulates author Henry M Levin winner of the 2017 AERA Distinguished Contributions to Research in Education Award

Methods for the Economic Evaluation of Health Care Programmes Michael F. Drummond, Mark J. Sculpher, Karl Claxton, Greg L. Stoddart, George W. Torrance, 2015-09-25 The purpose of economic evaluation is to inform decisions intended to improve healthcare The new edition of *Methods for the Economic Evaluation of Health Care Programmes* equips the reader with the necessary tools and understanding required to undertake evaluations by providing an outline of key principles and a tool kit based on the authors own experiences of undertaking economic evaluations Building on the strength of the previous edition the accessible writing style ensures the text is key reading for the non expert reader as no prior knowledge of economics is required The book employs a critical appraisal framework which is useful both to researchers conducting studies and to decision makers assessing them Practical examples are provided

throughout to aid learning and understanding The book discusses the analytical and policy challenges that face health systems in seeking to allocate resources efficiently and fairly New chapters include Principles of economic evaluation and Making decisions in healthcare which introduces the reader to core issues and questions about resource allocation and provides an understanding of the fundamental principles which guide decision making A key part of evidence based decision making is the analysis of all the relevant evidence to make informed decisions and policy The new chapter Identifying synthesising and analysing evidence highlights the importance of systematic review and how and why these methods are used As methods of analysis continue to develop the chapter on Characterising reporting and interpreting uncertainty introduces the reader to recent methods of analysis and why characterizing uncertainty matters for health care decisions The fourth edition of Methods for the Economic Evaluation of Health Care Programmes has been thoroughly revised and updated making it essential reading for anyone commissioning undertaking or using economic evaluations in health care including health service professionals health economists and health care decision makers **The American Economic Review**, 1930 Includes annual List of doctoral dissertations in political economy in progress in American universities and colleges and the Hand book of the American Economic Association *The Economics of Health and Medical Care* Philip Jacobs, John Rapoport, 2004 This newly updated and expanded edition strikes the necessary balance of population based health economics and the more traditional market oriented approach to health care economics Technological Economics Shoubo Xu, 2020-10-26 This book creatively puts forward the subject nature object system theory method and application of technical economics and brings together the research achievements of 50 years especially the latest research results It is of great significance for the development of China's technical and economic disciplines and the cultivation of special talents for technical and economic development It is of great significance for the solution of major technical and economic problems in economic and social development and has a landmark significance in the history of world technical economics The book can be used as teaching material for both the liberal arts science and engineering students within higher education institutions and as a leading cadre training source for engineers Furthermore it can facilitate readers engaged in policy making program planning macro control evaluation of investment decision feasibility studies project with aspects such as government consulting companies banks and financial personnel needs Also this book can aid readers with engineering design product development business management as well as with the needs of engineering and technical personnel and enterprise management personnel The Economic Review, 1908 **Economic Evaluation in U.S. Health Care** Laura Pizzi, Jennifer Lofland, 2006 Economic Evaluation in U S Health Care provides an overview of the methodologies that can be applied to both drug and non drug interventions The text addresses the perspectives of different stakeholders involved in the application of economic evaluation in the U S including manufacturers health plans and the government in order to give students a thorough understanding of how methods are applied to decision making and health policy The authors provide

case studies for students to apply methods to real life situations

An Economic Evaluation of ARDA Richard R. Barichello,1977 Theory and Methods of Economic Evaluation of Health Care Magnus Johannesson,2010-12-03 Most economic evaluations of health care programmes at the moment are cost effectiveness and cost utility analyses The problem with these methods is that their theoretical foundations are unclear This has led to confusion about how to define the costs and health effects and how to interpret the results of these studies In the environmental and traffic safety fields it is instead common to carry out traditional cost bene fit analyses of health improving programmes This striking difference in how health programmes are assessed in different fields was the original motivation for writing this book The aim of the book is to try and provide a coherent framework within cost bene fit analysis and welfare economics for the different methods of economic evaluation in the health care field The book is written in an easily accessible manner and several examples of applications of the different methods are provided It is my hope that it will be useful both for teaching purposes and as a guide for practitioners in the field Glenn C Blomquist John D Graham Rich O Conor and four anonymous referees provided helpful comments on previous versions of the manuscript I would also like to express my gratitude to the following persons for helping me to prepare the manuscript Carl Magnus Berglund Carin Blanksvard Ann Brown and Ziad Obeid
