least developed countries as they design their strategies to accelerate growth and alleviate poverty

Infrastructure Investments in Developing Economies Giang Dang, Low Sui Pheng, 2014-10-18 This book aims to provide knowledge on how infrastructure is planned and built in a typical developing country and what key variables are there in the system limiting the efficient use of public investments in infrastructure The book begins with a comprehensive literature review on construction and economic development and trade and economic development The focus of the book is on the case of Vietnam with lessons drawn for other developing economies The book employs the mixed use of data to provide a stronger basis for analysis and interpretation of related government policies Based on the research findings the book recommends significant capacity building work for Vietnam to develop capacities that would remove constraints on the efficient use of public investments in infrastructure The general principles of significant capacity building work which are useful for policy implications are introduced in the book Analysts academics public and private communities in developing countries can adopt the research findings as guiding principles to bring about changes in their current use of public investments in infrastructure thus supporting their trade and economic growth in the long term

The Internet and Economic Growth in Least Developed Countries Charles Kenny, 2002 *Globalization and the Least Developed Countries* David Bigman, 2007-01-01 This book evaluates the policies of least developed countries LDCs and the decisions that they now face against the backdrop of the changes in the structure of the global economy and in the globalization process itself It analyses possible scenarios and alternative trade and growth policies that are likely to affect the LDCs and their poor population in order to draw lessons for future policies The book has 6 chapters and a subject index

Understanding Economic Development Colin White, 2009 An invaluable survey of the literature on growth Colin White argues persuasively and expertly that any attempt to solve the profound mystery of economic growth at the large scales of world history must move beyond the limited vision of neo classical economic theory and incorporate the narrative methods and perspectives of history as well This is a superb overview and critique of contemporary attempts to explain economic growth and a perceptive re examination of the whole issue of growth in human history David Christian Macquarie University Australia Colin White transcends a number of false dichotomies in this work He shows that we need both theory and history in order to comprehend the transition to modern economic growth He appreciates that this transition was neither inevitable as many theorists argue nor entirely contingent as historical treatments often suggest He argues that advice to present day less developed countries should combine a general understanding of the process of transition with detailed analysis of the history and conditions of the country in question He appreciates that it makes sense to speak of an Industrial Revolution while also recognizing that this was a gradual process that in turn built upon even more gradual changes in earlier centuries in the British economy Less obviously but importantly he realizes that we can best understand economic growth if we recognize the limitations of each scholarly approach in order to integrate the best of these Rick Szostak University of Alberta Canada This fascinating book considers

one of the most important problems in economics the inception of modern economic development There is at present no satisfactory explanation of the inception of modern economic development an excessive focus on either pure theory or on unique histories limits the explanatory power This book realises the need to integrate the two approaches moving beyond the proximate causes of economic theory to review the role in an analytic narrative of significant ultimate causes geography risk environments human capital and institutions Colin White distils the conclusions of a vast literature drawing from economics economic history and business and management exploring economic theory demonstrating limitations and highlighting alternative approaches Particular attention is paid to the appropriate role of innovative entrepreneurs and of government and three case studies illustrate how to build an analytic narrative Showing how far we can generalise about the determinants of economic development and in particular how to understand the specific determinants in individual countries this book will prove a stimulating and thought provoking read to academics students and researchers with an interest in economics and economic development
