Wayne Nafziger,1997 The growth in real income per person in the third world nations of Latin America Asia and Africa about twofold since 1950 is a mixed record On the one hand the growth warrants optimism particularly in Taiwan South Korea Singapore Malaysia Thailand Indonesia China other fast growing Pacific Rim countries and Brazil The Economics of Developing Countries H. Myint,1964 **Economic Progress and Policy in Developing Countries** Angus Maddison,2013-10-16 First published in 2005 The central issue of our times is the unequal income of nations Its importance outweighs most of the domestic problems in rich countries and the division of the world into rich and poor has become more significant than the ideological cleavage between communism and capitalism There are twenty five rich countries but more than 100 countries who are in the where income range Two thirds of the world s population live in the latter group This study focuses on those countries and looks at economic policy and progress **The Developing Countries and the World Economic Order** Lars Anell,Birgitta Nygren,2013-11-07 The Developing Countries and the World Economic Order provides a lucid introduction to the debate about the developing countries and the quest for a New International Economic Order The primary objective is to indicate some of the fundamental requirements that must be satisfied by an equitable world order Since the present economic situation and demands of developing countries cannot be understood thoroughly without prior knowledge of how the present world order has evolved Part I begins with a detailed historical survey An account of economic development up to the Second World War and of the colonial heritage of the developing countries is followed by a description of the way in which the postwar world order came into being Part II analyses more recent developments including the central demands of developing countries and the background to these demands and outlines a new perspective on the NIEO programme with suggestions are offered on how the developing countries could secure for themselves a larger share of the world s resources A major theme of the book is that important changes in the world order take place irrespective of the recommendations adopted at international conferences **The Economics of the Developing Countries** Hla Myint (U.),1967 **The Economics of the Developing Countries** H. Myint,1982 *The Economics of the Developing Countries* Hla Myint,1974 The Palgrave Handbook of Development Economics Machiko Nissanke,José Antonio Ocampo,2020-08-28 This Handbook responds to the needs and aspirations of current and future generations of development economists by providing critical reference material alongside or in relation to mainstream propositions Despite the potential of globalisation in accelerating growth and development in low and middle income countries through the spread of technology knowledge and information its current practice in many parts of the world has led to processes that are socially economically and politically and ecologically unsustainable It is critical for

development economists to engage with the pivotal question of how to change the nature and course of globalisation to make it work for inclusive and sustainable development Applying a critical and pluralistic approach the chapters in this Handbook examine economics of development paths under globalisation focusing on sustainable development in social environmental institutional and political economy dimensions It aims at advancing the frontier of development economics in these key aspects and generating more refined policy perspectives It is critically reflective in examining effects of globalisation on development paths to date and in terms of methodological and analytical approaches as well as forward thinking in policy perspectives with a view to laying a foundation for sustainable development
