General Theory Of Evolution:

A Worldview Approach to Science and Scripture Carol Hill, 2019-11-19 Geologist Carol Hill examines how numerous apparent conflicts between Scripture and science can be resolved by understanding the ancient worldview of the scriptural authors and how it differs from our modern scientific worldview This framework opens the door to clearing up longstanding questions such as Are the Genesis patriarchs ages real numbers Are the days of creation actual 24 hour days Where was the Garden of Eden located Was Noah s flood global or local Were Adam and Eve real people Is evolution a belief or a fact With photographs and diagrams throughout Hill explores the meaning of the relevant biblical passages the scientific data and how the worldview approach addresses seeming contradictions Anyone who has wrestled with these questions will find *A Worldview Approach to Science and Scripture* to be an invaluable resource for understanding the interplay between faith and the world Carol Hill takes both Scripture and science seriously affirming the inspiration of the Bible and the evidence for biological evolution Deborah Haarsma President of BioLogos This is one of the best one volume works on the creation evolution dialogue in print Kenneth Keathley Southeastern Baptist Theological Seminary Carol Hill s worldview approach brings the reader face to face with archeological biblical and scientific data that enable one to gain a new appreciation for what the Bible is trying to teach This approach is a very helpful tool James K Hoffmeier Trinity Evangelical Divinity School *Collection of Selected Papers* ,1909 *Proceedings of the ... human learning and the greatest human intellectual accomplishments are rooted in our inherited capacity for attachments to each other In our love of those we learn from we find our way as individuals and as a species Never before has this intersection of the biology and psychology of childhood been so brilliantly described Nothing in biology makes sense except in the light of evolution wrote Dobzhansky In this remarkable book Melvin Konner shows that nothing in childhood makes sense except in the light of evolution
