Fieldwork Dilemmas:

Fieldwork, Participation and Practice Marlene de Laine, 2000-12-19 This timely and topical look at the role of ethics in fieldwork takes into account some of the major issues confronting qualitative researchers The main purposes of this book are twofold to promote an understanding of the harmful possibilities of fieldwork and to provide ways of dealing with ethical problems and dilemmas To these ends examples of actual fieldwork are provided that address ethical problems and dilemmas and posit ways of dealing with them **Fieldwork Dilemmas** Hermine G. De Soto, Nora Dudwick, 2000 *Feminist Dilemmas in Fieldwork* Diane L. Wolf, 2019-09-27 Fieldwork poses particular dilemmas and contradictions for feminists because of the power relations inherent in the process of gathering data and implicit in the process of representation Although most feminist scholars are committed to seeking ethical ways to analyze women and gender these dilemmas are especially acute in fieldwork where research *Fieldwork in the Global South* Jenny Lunn, 2014-03-26 Choosing to do fieldwork overseas particularly in the Global South is a challenge in itself The researcher faces logistical complications health and safety issues cultural differences language barriers and much more But permeating the entire fieldwork experience are a range of intermediating ethical issues While many researchers seek to follow institutional and disciplinary guidelines on ethical research practice the reality is that each situation is unique and the individual researcher must negotiate their own path through a variety of ethical challenges and dilemmas This book was created to share such experiences to serve not as a manual for ethical practice but rather as a place for reflection and mutual learning Since ethical issues face the researcher at every turn and cannot be compartmentalized into one part of the research process this book puts them at the very center of the discussion and uses them as the lens with which to view different stages of fieldwork The book covers four thematic areas ethical challenges in the field ethical dimensions of researcher identity ethical issues relating to research methods and ethical dilemmas of engagement with a variety of actors This volume also provides fresh insights by drawing on the experiences of research students rather than those of established academics The contributors describe research conducted for their master's degrees and doctorates offering honest and self-critical reflections on how they negotiated ethical challenges and dilemmas The chapters cover fieldwork carried out in countries across Africa Asia and Latin America on a broad sweep of development related topics This book should have wide appeal to undergraduates postgraduates and early career researchers working under the broad umbrella of development studies Although focused on fieldwork in the Global South the discussions and reflections are relevant to field research in many other countries and contexts **Dispatches from the Field** Andrew Gardner, David M. Hoffman, 2006-04-17 Penned by advanced graduate students amidst their dissertation fieldwork these provocative essays capture the challenges and intricacies of that anthropological rite of passage The collections authors frankly portray the mistakes they made in the field their struggle to analyze the events unfolding before their eyes the psychological and emotional frustration seemingly endemic to doing ethnography and the ethical

complexities of researching living people The authors present these essays not as models of ideal fieldwork or as a series of lessons about how to overcome potential hurdles one faces in the field but rather as a window into the complexities of being an ethnographer in the contemporary world Against a backdrop of subject populations increasingly informed about global relations of power and more specifically informed about the topography of American imperialism these humanistic essays vividly reflect recent shifts in both the focus and methods of anthropological research as well as the dilemmas underlying the construction of anthropological knowledge They are meant to spark discussion and debate While tailored to an audience relatively new to ethnographic fieldwork and intended as a teaching tool this collection should appeal to anthropologists and ethnographers at all points in their career

Fieldwork Christopher Pole,2005-01-21 Fieldwork is one of the richest research methods in the Social Sciences Originally the preserve of anthropologists notably Bronislaw Malinowski it has now achieved a much wider relevance This four volume set provides the most systematic guide to the method Volume 1 addresses the Origins and Definitions of Fieldwork and includes sections on the meaning of Fieldwork Fieldwork and Theory Early Fieldwork Fieldwork and Fieldworkers Volume 2 concentrates on the Fieldwork Experience and covers the History of Fieldwork Sampling in the Field Observing in the Field Field Talk Interviews and Conversations Documents and the Field Visual Methods and Fieldwork and Reflecting On Fieldwork Experience Volume 3 focuses on Ethics and Politics in Fieldwork and includes sections on The Relevance of Politics and Ethics Taking Sides Sensitive and Stressful Situations Dilemmas and Responsibilities Volume 4 addresses the Analysis Outcomes and Reflections of Fieldwork and includes sections on Analyzing Fieldwork Fieldwork and the Author Representing Fieldwork Autoethnography and Writing Method and Leaving The Field The collection is a superb addition to the series providing readers with a comprehensive and indispensable critical guide to Fieldwork Christopher Pole lectures in Sociology at the University of Leicester

ECRM 2019 18th European Conference on Research Methods in Business and Management Prof. Anthony Stacey,2019-06-20 *Chasing Traces* Pierre Petit,Jean Michaud,2025-05-31 In the connected highlands of southwest China Vietnam and Laos recalling the past is a highly sensitive act Among local societies many may actively avoid recalling the past for fear of endangering themselves and others Oral traditions and rare archives remain the main avenues to visit the past but the national revolutionary narrative and the language of heritagization have strongly affected the local expression of historical memory Yet this does not prevent local societies from producing their stories in their own terms even if often in conflict with both national and Western categories Producing history ethnohistory historical anthropology and historical geography in the Southeast Asian highlands raises significant questions relating to methodology epistemology and ethics for which most researchers are often ill prepared How can scholars manage to competently access information about the past How is one to capture history in the making through events speech acts rituals and performances How is the memory of the past transmitted or not and with what logic Based on the experiences and reflections of a dozen diverse scholars rooted in decades of work in these three

communist states Chasing Traces is the first book about historical ethnography and related issues in the Southeast Asian highlands Taking a critically reflexive posture the authors make a plea for the individual the hidden and the backstage for what life is really like on the ground as opposed to imagined homogeneity legibility and unambiguousness Their investigations on the history of ethnic minority communities adds archival historiography to ethnographic fieldwork and examines the relationship between the two fields The individual chapters each tell distinctive stories of the conjunction of fieldwork archival research official surveillance community participation cultural norms partnership with local scholars and the other factors that both facilitate and frustrate the research enterprise of writing about the past in these societies A timely work this volume also provides guidelines for alternative ways to document and reflect when physical access becomes limited due to factors such as pandemic political instability and violence and offers creative ways for researchers to cope with these dramatic shifts

Ethics and Anthropology Michael A. Rynkiewicz, James P. Spradley, 1981

Reimagining Utopias Iveta Silova, Noah W. Sobe, Alla Korzh, Serhiy Kovalchuk, 2017-07-13

Reimagining Utopias explores the shifting social imaginaries of post socialist transformations to understand what happens when the new and old utopias of post socialism confront the new and old utopias of social science This peer reviewed volume addresses the theoretical methodological and ethical dilemmas encountered by researchers in the social sciences as they plan and conduct education research in post socialist settings as well as disseminate their research findings Through an interdisciplinary inquiry that spans the fields of education political science sociology anthropology and history the book explores three broad questions How can we re imagine research to articulate new theoretical insights about post socialist education transformations in the context of globalization How can we re imagine methods to pursue alternative ways of producing knowledge And how can we navigate various ethical dilemmas in light of academic expectations and fieldwork realities Drawing on case studies conceptual and theoretical essays autoethnographic accounts as well as synthetic introductory and conclusion chapters by the editors this book advances an important conversation about these complicated questions in geopolitical settings ranging from post socialist Africa to Eastern Europe and Central Asia The contributors not only expose the limits of Western conceptual frameworks and research methods for understanding post socialist transformations but also engage creatively in addressing the persisting problems of knowledge hierarchies created by abstract universals epistemic difference and geographical distance inherent in comparative and international education research This book challenges the readers to question the existing education narratives and rethink taken for granted beliefs theoretical paradigms and methodological frameworks in order to reimagine the world in more complex and pluriversal ways

Just Methods Alison M. Jaggar, 2015-11-17

The supplemented edition of this important reader includes a substantive new introduction by the author on the changing nature of feminist methodology It takes into account the implications of a major new study included for the first time in this book on poverty and gender in equality and it includes an article discussing the ways in which this study was conducted using the research methods put

forward by the first edition This article begins by explaining why a new and better poverty metric is needed and why developing such a metric requires an alternative methodological approach inspired by feminism Feminist research is a growing tradition of inquiry that aims to produce knowledge not biased by inequitable assumptions about gender and related categories such as class race religion sexuality and nationality Just Methods is designed for upper level undergraduate and graduate students in a range of disciplines Rather than being concerned with particular techniques of inquiry the interdisciplinary readings in this book address broad questions of research methodology They are designed to help researchers think critically and constructively about the epistemological and ethical implications of various approaches to research selection and research design evidence gathering techniques and publication of results A key theme running through the readings is the complex interrelationship between social power and inequality on the one hand and the production of knowledge on the other A second and related theme is the inseparability of research projects and methodologies from ethical and political values

Existential Dilemmas, Anxiety, and Social Control in a Tlaxcalan Village Brian Peter Farley,1990 Developing Fieldwork Skills Rosemary Chiaferi,Michael Griffin,1997 Where do I fit in the organization How can I deal effectively with my supervisors How do I handle legal and ethical issues These are some of the most pressing issues interns face when they make the transition from the classroom to the real world The authors succeed in creating a book that is thought provoking and invaluable to human services counseling and social work students The authors draw upon their years of extensive experience Chiaferi as a psychotherapist and Griffin as a clinical social worker to provide a first hand humanistic and personable approach to the fieldwork course effectively addressing the fears and anxieties common to individuals at various stages in their practicum experience *Fieldwork: Ethics and politics in fieldwork* Christopher John Pole,2005 **Research Realities in the Social Sciences** Gregory S.
